| 1.3 | Maximum and Minimum Temperatures by station and by month in the district from 1951 to 1960 - | 314-315 |
| | 2 Vital Statistics | |
| 2.1 | Number of births and deaths in the district from 1951 to 1960 | 316 |
| 2.2 | Deaths from some selected causes in the district from 1951 to 1960 - - - - - | 316 |
| | 3 Land Utilisation and Agriculture | |
| 3.1 | Land Utilisation Statistics in the district for the decades 1901-1961. - - - - - | 317 |
| 3.2 | Area under principal crops in the district for the decades 1901 to 1961. - - - - - | 318 |
| 3.3 | Gross area irrigated under different crops in the district for the decades 1901 - 1961. | 319 |
| 3.4 | Irrigated area by source in the district for the decades 1901-1961. - - - - - | 319 |
| 3.5 | Irrigation Projects in the district. - - - - - | 320 |
| 3.6 | Yield rate of principal crops in the district 1951-52 to 1959-60. - - - - - | 320 |
| 3.7 | Daily agricultural wages at some selected villages in the district from 1957 to 1960. | 321-331 |
| 3.8 | Fortnightly wholesale prices of important commodities in the district from 1958 to 1960. | 332-365 |
| 3.9 | Average retail prices of important commodities based on selected centres in the district from 1952 to 1960. | 366-371 |
| | 4 Livestock | |
| 4.1 | Variation in the number of main Livestock in the district during 1945-1961. | 372 |
| | 5 Industries | |
| 5.1 | List of all categories of industries in the district based on Houselists. | 373-377 |
| 5.2 | Large scale industries and registered factories in the district. | 380-382 |
| | 6 Administration | |
| 6.1 | Number of criminal cases tried and persons convicted in the district from 1951 to 1960. | 383 |
| 6.2 | Strength of Police and Jails in the district from 1951 to 1960. | 384 |
| 6.3 | Different types of Cooperative Societies in the district from 1951-52 to 1960-61. | 385 |
| 6.4 | Receipts of revenue under different heads in the district from 1951-52 to 1960-61. | 386 |
| | 7. Public Entertainment, Press and Journals. | |
| 7.1 | Number of Printing Press, Newspapers, Cinema Houses and other places of public entertainment and Periodicals & Journals. | 387 |
| | 8 Education | |
| 8.1 | Number of different types of educational institutions, number of students in the district from 1959-60 to 1960-61. | 388-391 |
| | 9 Communication | |
| 9.1 | Names and length of village roads in the district. | 392-399 |
| 9.2 | Different categories of roads in the district as on 31st March, 1961. | 400-402 |

| | | |
|--|--|--------------------|
| 9.3 | List of important bridges on National Highways in the district. | 403-408 |
| 9.4 | Railway Stations in the district. | 409 |
| 9.5 | Navigable waterways in the district. | 410 |
| 10 Local Bodies | | |
| 10.1 | List of Anchalik Panchayats in the district. | 411-412 |
| 10.2 | List of Municipalities & Town Committees in the district. | 413 |
| 11 Community Development | | |
| 11.1 | Names and Stages of the Community Development Blocks in the district. | 414 |
| 12 Banks and Small Savings | | |
| 12.1 | List of Banking Institutions functioning in the district 1960-61. | 415 |
| 12.2 | Gross and Net collections on Small Savings in the district from 1951-52 to 1960-61. | 416 |
| 13 Fairs and Festivals | | |
| 13.1 | List of Fairs and Festivals- time of the year and duration - in the district. | 417-418 |
| 13.2 | List of different types of Hats and Markets in the district. | 419-423 |
| 14 Calendar of important events | | |
| | A descriptive note on the calendar of important events of the district. | 424 |
| 15 Ancient mounuments, places of worship And Gazetteer of place names | | |
| | A descriptive note on the Ancient Monuments and Antique objects Gazetteer of place names of the district. | 424-426 426-427 |

PREFACE

District Census Handbooks were introduced for the first time during the 1951 Census. In the 1961 Census, the District Census Handbooks have further been improved by making the introduction of the districts more elaborate, by the addition of official statistics and by having separate tables for Scheduled Tribes and Scheduled Castes. The introduction to each district is a sort of gazetteer giving the physical features, geological data, climate, rainfall and temperature, flora and fauna etc. and a short history of the people inhabiting the district. Sociological data about the people have also been given briefly. Attempts have also been made to appraise the impact of the two Five Year Plans on the economy of each district. Official statistics are given in the form of tables, but there is also an introduction explaining the purpose and utility of the official statistics. For example, the District Census Handbook will supply the number of schools and dispensaries existing in each district as well as the road mileage and many other data which one would like to know about each district. Such data will be useful to the administrators, legislators and sociologists who want to study the people of any district.

Data on the various subjects mentioned above have been collected from the District Gazetteers prepared by Mr. B. C. Allen ICS, from monographs written on the people by well-known ethnographers and sociologists as well as from various Departments of Government, both Central and State. Many Deputy Commissioners and Subdivisional Officers have greatly helped me in supplying such data as are available with them concerning the district. The nature, quality and quantity of the data supplied by each Deputy Commissioner and Subdivisional Officer vary directly according to the interest that each officer has in his district/subdivision.

The preparation of tables was done under the able guidance of Sarvashri J. C. Bhuyan and K. S. Dey, Tabulation Officers, to whom I am greatly indebted. I could not have dictated my write-ups in such a short space of time had it not been for the great help given by my two Stenographers, Sarvashri G. Raghuram and J. Ramsden.

I am indebted to Prof. K. N. Dutta, Editor, Revision of District Gazetteers, who has given me a good deal of data for the district.

E. H. Pakyntein

INTRODUCING THE DISTRICT

SIBSAGAR DISTRICT

THE DISTRICT OF SIBSAGAR is situated on the south bank of the Brahmaputra with boundaries lying between 25.49° and 27.17° north latitude and 93.5° and 95.26° east longitude.

It is in the middle eastern part of the State of Assam and covers an area of 3476 square miles. It stands seventh in regard to area as compared with the other districts of the State. On the north, it is bounded by the districts of Darrang and Lakhimpur ; on the east by the district of Lakhimpur and the Tirap Frontier Division of NEFA ; on the south by the newly-formed Nagaland, and on the west by the districts of the United Mikir and North Cachar Hills and Nowgong. On November 17, 1951 the Mikir Hills area was separated from this district to form a new district with the name of United Mikir and North Cachar Hills. The district consists of three subdivisions, viz. Jorhat, Golaghat and Sibsagar. The Jorhat subdivision consists of the thanas of Majuli, Teok, Jorhat and Titabar ; Golaghat consists of Bokakhat, Dergaon and Golaghat thanas and under the Sibsagar subdivision fall the Amguri, Sibsagar, Sonari and Nazira thanas.

PHYSICAL FEATURES

The district can be split up into three natural divisions. Throughout the whole of its course through Sibsagar, the river Brahmaputra is bounded on the south by a belt of flooded lands varying from three or four to as much as seven or eight miles in width. This part is covered with high reed jungle scattered with swamps and 'bils' and magnificent stretches of rich fodder grass. There are few Assamese villages in this tract and there is little cultivation except of summer rice followed by pulse or mustard. The inhabitants of this tract are generally Miris whose houses are built on piles which raise them well above the level of the floods. There are some families of Nepalese graziers whose buffaloes wander at will over the marshes and sandy chars. West of Bokakhat, this strip of inundated country is seven or eight miles in breadth, and affords a splendid shelter for every kind of game. There are patches of tree forests in which wild elephants and mithuns can shelter from noon-day heat, and stretches of high reeds impenetrable to none but the larger animals. In this area there are some muddy pools in which the great

rhinoceros wallow, surrounded by reeds and grasses from twelve to fifteen feet in height. There are 'bils' or shallow moors lying at the bottom of basins carpeted with luscious fodder grass, and enclosed by a wall of jungle. Here the wild pigs come and burrow for their food, and wild buffaloes wallow in the water or lie beneath the shade of the gigantic reeds. Near the tree jungle there is high ground where the grasses cannot grow so rank and the deer can make their home.

South of this flooded land and east of the Dhansiri, there is a wide and healthy plain lying between Nagaland and the Brahmaputra. It is the most populous and important portion of the district in which there is hardly any jungle to be seen and where cultivation brings in considerable prosperity and progress. On lower lands, the staple crop is transplanted rice, while the higher lands have been planted out with tea. The landscape is one of rural plenty. On every side stretch fields of waving rice, and on every side the view is bounded by groves of feathery bamboos and slender areca palms in which the houses of the cultivators lie concealed. The tea gardens themselves have little to appeal to the lover of the picturesque. The rows of bushes are pruned down to one uniform level, and the monotony of this expanse of green is only relieved by the labourers' lines, the factory and the managers' bungalows. The river Dhansiri is no longer the administrative boundary, but, as a matter of fact, it is the natural boundary of the Upper Assam. East of that river is a broad fertile plain stretching right through Sibsagar and Lakhimpur to the No-Dihing. The whole of the plain is very homogeneous in its features. It is healthy, populous and well cultivated, a country of prosperity and progress. West of Dhansiri is Central Assam, a country of hills, forest and marsh, inhabited by tribes of Bodo origin or by Assamese from the lower part of the valley. This country has only felt to a very modified degree the quickening effects of the tea industry. The part of Sibsagar that lies west of the Dhansiri differs as much from the part east of that river as Nowgong does from Lakhimpur or the Jaintia Hills from the Jaintia Parganas. However, on the west of the Disoi, the appearance of this plain is diversified by the protrusion of sub-soil, and rice is often grown in curious depressions called 'hoolas' which are three or four feet below the level of higher land. The ground between the 'hoolas' is used

for grazing or for the village site and is often planted out with sugarcane. The Upper valley of the Dhansiri and the Doyang is covered with dense tree forest which is almost entirely destitute of population. A wonderful view of this forest can be seen from one end of the outer ranges of the Naga Hills.

North of the Brahmaputra is Majuli, the greatest river island in the world, occupying nearly 359 square miles of area and accommodating no less than 80,179 inhabitants. This island is separated from Lakhimpur by the Kherkotiasuti, at one time the main channel of the Brahmaputra and the Subansiri. This part is too low for cultivation of transplanted rice. Much of the country is still under high reed jungle and under fine tree forest. It is a country of luxuriant vegetation, of light sandy soil covered with fresh grass, of deep pools surrounded by umbrageous trees, of village paths and tracts bordered and carpeted with ferns. There is only one road in the island which crosses it about the centre, and the inhabitants seem quite cut-off from the strenuous and eager life in the neighbourhood of Jorhat.

The old picture has changed somewhat and now-a-days the high reed jungle can be seen only in the very low lying areas. With the growth of population, the fine forest trees are not seen everywhere. The main cultivation in this part is ahu, bao, mustard and sali. So far as communication is concerned, there are three main P.W.D. roads, one from North Lakhimpur to Kamalabari, connecting the south bank of the Brahmaputra with the former and the Majuli; the second from Baghaon to Salmara-gaon and the third from Pahumara along the river Subansiri to Haldibari through a big tribal belt. But improved communication has not brought economic progress to the inhabitants in its wake. The joint family system is still widely prevalent among the Miris, the Deoris and the Sonowal Kacharis of the Majuli.

Majuli is a principal place of pilgrimage for the Vaishnavites of Assam since the days of the Ahoms. In it are situated the several Satras or Monasteries which besides being religious centres, are also the strongholds of important elements of Assamese art and culture. Great kindness and hospitality are shown to visitors by the inmates of the Satras, notable among which are the Satras of Kamalabari, Auniati, Garamur and Dakshinpat.

Origin of the name

The name Sibsagar itself has an important historical significance. Sibsagar, a big lake (sagar meaning sea) gives its present name of Sibsagar to the old town of Rang-

pur. In the year 1733 A. D. the Ahom Queen Ambika Devi dug a tank at the then capital of Rongpur, covering an area of 257 acres, to commemorate the name of her husband, king Siva Singha. The place came to be known as Sibpur being associated with the great Siva temple (Siva Dol) built on the bank of this tank. With the passage of time, the name Sibsagar, alluding both to the tank and the town gained popularity. During the declining days of the Ahoms, Purandar Singha was entrusted in 1833 with the administration of Upper Assam by the East India Company which had already won mastery over Assam in 1826 as a result of the First Anglo-Burmese war. In the year 1838 the whole area was resumed by the authorities of the East India Company and was annexed to the British territory and in the same year Col. Adam White was appointed its Political Agent. By a proclamation in 1839 the area was divided into the two districts of Sibsagar and Lakhimpur and placed under the same administration as prevailed in the Lower Assam districts. Thus Sibsagar district came into being, bordering on the river Dhansiri on the west and the Namsang Tipam Parbat on the east, and the origin of its name can be traced back to a historical event rather than to a mythological one as in the case of Kamrupa.

Mountain System

The whole of the district is a level plain. Two small hillocks call for special mention, but only on account of the associations with which they are connected and not from any intrinsic importance of their own. The Charaideo Hill in the Dhopabar mauza was once the burial place of the Ahom kings. The ruins of their tombs still tell the story of their glory. The treasures of these tombs were taken away by the Muslim invaders of the 17th Century. The Negheriting is a small hillock in the bank of the Brahmaputra on which stands the temple of Lord Siva.

River System

The whole of the drainage of the district ultimately finds its way into the Brahmaputra. The Brahmaputra flows through the northern part of the district which can be reckoned as a boundary line with Lakhimpur and Darrang. As it flows from east to west on the north of the district it forms the Majuli, the greatest river island in the world.

The Brahmaputra has two names. One is Lauhitya which is evidently a Sanskritized form of the Tibeto Burman name Luhit. The word Lauhitya gives good enough meaning in Sanskrit as "The Red River", but it

is in all likelihood just a Sanskritisation of the pre-Aryan, Sino-Tibetan name. It is so called because of the fact that the river takes this colour during the rainy seasons when it cuts through the red soil of the adjoining embankments. There is a mythological interpretation of the origin of the name. It is connected with Parasurama and his sin. It was in this river, it is said, that the great saint washed off his bloody stains due to matricide and regained his sainthood and hence the water of the river is red.

The other name which is better known, is Brahmaputra which means the "Son of Brahma" and is within the orbit of the Sanskrit nomenclature. The Ahom called this river Nam-Dao-Phi which means the "river of the Star-god". The Brahmaputra is formed by the Dibang and the Lohit rivers on the north-east merging into the Dihang, and thus joins into one big river.

An element of romance hangs over the river because certain portion of its course has not yet been actually explored, though there is little doubt that the Tsang-po of Tibet, pours its waters through the Dihang into the river which is known as the Brahmaputra in Assam. Rising in the Himalayan glaciers, this mighty river Brahmaputra, which has a total length of 1,800 miles, flows for about half of its length in a long narrow channel, north of the Himalayas running parallel to the main Himalayan range. Then it passes north-east, runs through many gorges in a series of cascades, makes a bent and turns south and south-west. After receiving the waters of the Dihang and the Lohit, the united river from this point flows 450 miles down the Assam Valley in a vast sheet of water dotted with numerous islands, the chief among them being Majuli and Umananda.

The mass of silt brought down from the Himalayas is sufficient to form sand banks and even islands, in the lower valley wherever any impediment blocks the current of the river which thus alters its channel and admits an intricate network of waterways. In the winter, the main channel of this river shrinks to a moderate dimension and is surrounded on both sides by sandy flats or beds of reeds and grasses. In the summer season, the river stretches itself to an enormous extent over the marshy country on either side and, when in flood, the distance between one bank and the other is very great. The water of the river is heavily surcharged with suspended matters and the smallest obstruction in the current is liable to give rise to an almond-shaped *chapori*, but the next flood may wash this *chapori* away or may increase its size by fresh deposit of sands, covered with reeds and jungle grasses

in a few seasons. These operations of alluvium and diluvium are continually carried on in a gigantic scale by the Brahmaputra.

Throughout the greater part of its course in Assam, the Brahmaputra is bounded on either side by stretches of marshy lands covered with thick grassy jungle relieved occasionally by patches of cultivated land. Where the elevation is higher, the plain is covered with rice fields and dotted over with clumps of bamboo, palm and fruit trees.

Shoals are continually formed, causing serious impediments to navigation. From old records we find quoted some 84 shoals in existence between Dibrugarh and Gauhati and 43 shoals between Gauhati and Goalundo. The navigable channels through these shoals are clearly marked by bamboo marks. It should be quite appropriate to mention here that after the great earthquake of 1950, the river bed of the Brahmaputra has risen up in Assam, especially in Upper Assam. Formerly, steamers can ply up to Dibrugarh and even beyond that in the district of Lakhimpur, but now no steamer can ply through the river in this district due to this reason. In Sibsagar district also, steamers can ply only up to Neamati Ghat.

During its passage through the district of Sibsagar, the Brahmaputra receives many tributaries which are generally coming out from the south. On the extreme east is the river Dihing which for the last few miles of its course forms the boundary between Sibsagar and Lakhimpur. Next is the Disang, which starting from the Naga Hills, flows a north-easterly course till it reaches Assam, and then curves back and runs west-ward right along the north of Abhaipur and Silakuti mauza. When parallel to and about eight miles from Sibsagar Town, it takes a bent towards the north and finally empties itself into the Brahmaputra after a total course of 136 miles. Its principal tributaries on the right bank are the Diroi and Diman and on the left bank the Taokak and Sagrai. The Disang flows in a deep channel and does not change its course, but in the rains it often overtops its banks. There is little variation in the bedwidth throughout the river length. It also comes to light that the depth undergoes a major change with the increase in discharge of the river. There are a lot of curves in this river though they are not of acute nature.

West of the Disang is the Dikhou which rises right up in the Naga Hills and enters the district south of Nazira, flows past Sibsagar Town and falls into the Brahmaputra after a course of 120 miles. More than half of its course lies in the hills. Its principal tributaries in Sib-

sagar is the Darika which flows a little to the north of Sibsagar Town and falls into the Dikhou near its mouth. Both of these rivers overtop their banks during flood. The width of the river is not much and more or less uniform throughout. There also exists a good number of curves which are rather acute in nature.

The Sibsagar and the Jorhat subdivisions are demarcated by the river Janzi. It rises near Mokokchung in the Nagaland, and after a northerly course through Sibsagar district, falls into the Brahmaputra. Its total length is 71 miles, and in its course through the plains it forms the boundary between the subdivisions of Sibsagar and Jorhat. In the dry season it becomes very shallow, and the navigability by boat is now confined only to the rainy season.

The river Desoi, like other rivers, rises in the Nagaland and after a north-westerly course through Sibsagar district, falls into the Brahmaputra. In the upper part of its course it is called the Desoi and the lower part of its course down from Mariani is called Bhogdoi. The name Bhogdoi first came into use at the end of the eighteenth century. Mariani and Jorhat are situated on the left bank of the river. The river is very badly silted up and there remains hardly a foot of water in winter. Due to the shallowness of the river bed, the water in the rainy season overtops its banks in many places. The river is not navigable at all. The total length of the river is only 81 miles.

The river Kakodonga is a little more than 40 miles in length and forms a boundary between Jorhat and Golaghat subdivisions.

The Dhansiri is the largest river in the district after the Brahmaputra. Like other rivers, it rises in the Nagaland and near Dimapur it enters Sibsagar district and flows north-east to Golaghat, where it turns to the west and falls into the Brahmaputra opposite the west of Majuli after a total course of 180 miles. The upper portion of the Dhansiri valley is a plain of considerable width, shut in between the Naga and the Mikir Hills, and is covered with dense tree forest; and except in the neighbourhood of Golaghat, the greater part of its course lies through jungle land. During the monsoon, small steamers can ply in certain portions of the river.

West of Dhansiri, the only river of importance is the Diphlu, which for a considerable portion of its course, flow parallel with the Brahmaputra. This is a phenomenon which is exhibited in a greater or lesser degree by almost all the rivers in this district, as the tendency of the

drainage is to follow the levels of the country which naturally falls towards the west. All these rivers flow in deep channels except the river Bhogdoi and do not change their courses. The bottom is muddy, and no alluvial and diluvial action is going on there. The current as a rule is very slack, but like all streams rising in the hills, they are liable to sudden freshets.

Lakes and Tanks

The greater part of Sibsagar lies too high for the formation of lakes, bils or marshes, and the only ones of any size are situated in the Majuli and the flooded country south of the Brahmaputra. Even here, there are no sheets of water of any considerable size, and, as a rule, the bils take the form of deep ponds, very long in proportion to their breadth, which are simply the remains of rivers which have changed their courses.

There are plenty of tanks which still tell the tales of the Ahom rule. The total number of old tanks is very large, but five of them in Sibsagar subdivision stand out pre-eminently. The court buildings and the jail of Sibsagar have been built upon the banks of the Sibsagar tanks of beautiful fresh water. The area of the tank with its bank is 257 acres, the area under water is 129 acres and the present water depth is 20 cubits. About $2\frac{1}{2}$ miles south of Sibsagar Town there is Joysagar tank, the biggest in India, and on whose banks, besides old temples there are a few institutions including the Sibsagar College. The area of the tank with its banks is 318 acres; the area under water is 155 acres. About five miles south-west of the Sibsagar Town, there are two big tanks known as Na-Pukhuri and Purani Pukhuri. Some eight miles south-west of Sibsagar Town, there is the Gaurisagar tank. The area of the tank with its bank is 292 acres; the area under water is 150 acres. These tanks are surrounded by moats from which earth was taken for the embankment of the reservoirs. The water level of these tanks are higher than that of the encircling moats.

Geology

The geological history of the Sibsagar district, and for that matter of the Upper Assam Valley as a whole, is related to two long narrow subsiding troughs (geosynclines) lying on either side of an old rigid continental shield (foreland). The foreland is geologically the north-eastern continuation of the Shillong and Mikir Hills plateau and is concealed in the valley by a great thickness of alluvium and tertiary rocks. To the north of the mainland of Archaean rocks was an ancient central geosynclinal sea known as the Tethys. The geological

history of the rest of the Assam region is fragmentary up to the Tertiary time. With the beginning of the tertiary era, the sea extended further north-east and submerged the greater part of Assam. But for occasional and temporary retreat of the sea, marine condition prevailed till about the Miocene time. Thousands of feet of sediments were deposited on the foreland as well as in the geosynclines, the floors of all of which were slowly but continuously sinking.

Meanwhile, a series of intermittent earth movements went on in the Assam region. The movement accentuated in the post-pliocene age and the piles of sediments that were accumulating in the geosynclines were severely compressed and uplifted into the lofty Himalayas in the north and the Naga, Lushai and the other associated ranges of hills in the south. Finally, deposition began on the foreland area of the Upper Assam Valley, presumably, late in the Dihing times and continued until the present day.

The geology of almost the entire district is thus concealed by alluvial deposits. Geological survey aided by drilling for oil have shown that under the recent deposits there are many thousands of feet of tertiary sediments which lie over an Archaean basement complex. These tertiary rocks represent the foreland facies and are distinguishable from the geosynclinal facies of tertiary rocks which form the hills on the south and south-east of the district. Rocks of the latter facies are found out cropping in a small area within the district along the hills to the south of the railway line near the north-eastern boundary.

The tertiary rocks of the two facies may be broadly classified as follows :—

| Age | Local names |
|---------------------------|---|
| 1. Recent and Pleistocene | Alluvium |
| 2. Pliocene | Dihing Series (Dhekiajuli beds) |
| 3. Mio-Pliocene | Namsang beds possible unconformity |
| 4. Miocene | Tipam Series and Surma Series. Unconformity |
| 5. Oligocene | Barail Series |

Age

Local names

- | | |
|-----------|--|
| 6. Eocene | Disang Series (Naga Hills) Jaintia Series (Mikir Hills and Upper Assam Valley). |
|-----------|--|

The thick Disang Series (over 10,000 feet) of Naga Hills is composed mostly of shales whereas the comparatively thinner Jaintia Series (2000 feet) is composed of fossiliferous limestones, sandstones and shales in the Upper Assam Valley. The Barail Series is of considerable economic importance as it contains oil and workable seams of coal. The series is about 10,000 feet thick at the north-eastern end of the Naga Hills and includes sandstones and shales. In this area the upper portion of the Barail Series forms the coal-measure sub-series. In contrast to the above, the Barails are only 2,000 to 3,000 feet thick in the alluvial valley and are made up of sandstones, mudstone shales, oil sands and coal seams. The Surma Series consists mainly of alteration of shales and shaly sandstones. The Tipam Series is made up of clay sandstones, oil sands, mudstones and shales. The oil sands of Digboi are of this series. The Series in the Upper Assam Valley closely resembles the corresponding beds in Digboi, but is rather thinner. The succeeding beds are called Namsang Beds and are of sandstones, grits, conglomerates and beds of 'coal-conglomerate'. A series of pebblebeds unconformably overlying the Namsang Beds is known as the Dihing Series. The beds underlie the alluvial deposit of the Brahmaputra. The greater portion of the Sibsagar valley is covered by comparatively new alluvial deposits. Terraces of high level alluvium of the Pleistocene age occur along the foot-hills to the south-eastern border of the district.

Mineral Wealth

Coal is the only mineral which has so far been commercially exploited in the district. It is mined in the Nazira and Jaipur coalfields. Coal is also found on the Jhanzi and Disai rivers. The Jhanzi area is only three miles long and stretches into the Nagaland. It lies fifteen miles south-east of Amguri railway station. The Disai area is said to be about five miles long and situated just on the border of Nagaland, about ten miles south-east of Mariani railway junction. The seams in both those cases are few, thin and highly inclined. The coal have 3.4 to 6.8 per cent moisture, 4.8 to 6.5 per cent ash, 33.8 to 36.9 per cent volatile matter and 52.9 to 54.9 per cent fixed carbon.

The Nazira coalfield is nearly 16 miles long and situated about four miles south of Naginimara railway station up to the Dihon river. Except for a small outcrop of coal-measures within five miles of Safrai railway station. The coalfield lies in the Nagaland. Since the coal is worked out from Sibsagar, this coalfield may conveniently be described here.

The thickest coal measures are exposed in the Safrai river where there are fine worked seams totalling about 73 feet in thickness. The coal reserves estimated in limited areas of the coalfield appears to be about 40 million tons. Some of the coal seams are worked out by the Nazira Coal Company at the Nazira colliery situated in the Borjan-Waktingjan Valley. The colliery with an area of two square miles produced about 25,400 tons of coal in 1957. Data available from sources other than the Regional Coal Survey Station, Jorhat, indicate that the coal is of good quality. They have about forty per cent sulphur.

In Jaipur, outcrops of the seams are seen along a strip 25 miles long, about half of which lie in the Sibsagar district. A thickness of more than 45 feet of coal in six seams is exposed in the Dilli river. The coal-bearing rocks dip to the east with a high degree of inclination (30° to 80°). On the Sibsagar side, the coal is worked out by the Dilli Collieries (Assam) Limited. The colliery has an area of four square miles and produced 23,656 tons of coal in 1959.

Investigations carried out at the Regional Coal Survey Station, Jorhat, show that the Dilli coals have, on the air dried basis, 5.3 to 6.3 per cent moisture, 1.4 to 6.3 per cent ash, 40.5 to 43.9 per cent volatile matter and 46.7 to 49.5 per cent fixed carbon. Compared to the coals of Makuk Coalfield of Lakhimpur district, the Dilli coals have low carbon (75.71 to 79.21 per cent), low calorific value (13,460 to 14,150 Btu/lb) and high oxygen (12.29 to 14.23 per cent) on unit coal basis. The coals investigated appear to have been oxidised in situ and it is likely that they may improve in quality at depth. They have 1.31 to 4.68 per cent sulphur. The low temperature carbonisation of the coals in the Fischer Assay apparatus at 550°C give the following yields per metric tonne of dry coal : char 700 kilogram and tar 110 to 150 litres (14 to 15 cwt). Like all tertiary coals of Assam, the Dilli coals are friable and produce very high proportion of fires.

Oil

Over and above coal, oil is another mineral of

considerable economic importance which has recently been discovered in Sibsagar.

The Oil and Natural Gas Commission undertook exploration in Sibsagar and neighbouring areas for oil and natural gas early in 1957 when a seismic survey was initiated and continued later till today. Gravity Magnetic Surveys were carried out in 1962. At present, two seismic field parties are working in the area for location of suitable structures favourable for all accumulation.

Deep exploratory drilling commenced in 1959 in this area. The Disangmukh test well was dry. Rudrasagar well numbers 1,2 and 4 were completed in 1960, 1961 and 1962 respectively. Well No. 6 is now under drilling. Oil was encountered in all the wells drilling so far on the Rudrasagar structure

The Commission is carrying out production testing in the wells drilled in the area and is making arrangements for drilling in Lakwa and Teok areas.

Clay

So far as clay is concerned, much is yet to be known about the quality and quantity of clay found in the district. Ordinary clay for pottery and brick-making is found almost anywhere in the district. Fine clays have been found to occur with the coal seams, but their quality and quantity are not known. Fine white clay are reported from Borhat and Nambor rivers. The beds, however, require closer examination.

Special Features such as Volcanoes, Earthquakes, Earth Tremors Etc.

The frequency of earthquakes in Assam is closely related to the geology of the region. Earthquakes occur in places where the crust is markedly unstable, such as mountain belts of geologically recent origin. One such region is the arc formed by the Himalayas and the Naga and Lushai Hills around the northern, north-eastern and eastern border of the stable peninsular wedge of the Assam plateau with its north-eastern extension below the alluvium of the Upper Assam Valley. The orogenic forces which culminated in the rise of the mountains are still in progress, though equilibrium has largely been attained. Adjustments taking place from time to time find expression as earthquakes.

Like the rest of Assam, Sibsagar is also liable to earthquakes. The chronicler of Mir Jumla's expedi-

tion describes the alarm produced among the invaders by one of these unlooked for visitations. The great earthquake of 1897 was distinctly felt in Sibsagar and did considerable damage, though it was nothing in comparison with the widespread havoc wrought elsewhere in the State. The treasury at Golaghat was damaged and two brick pillars in the engine house at the Jorhat Railway Station collapsed. Some damage was done in tea gardens, and here and there stretches of roads were shaken down to the level of the rice fields. Even in Sibsagar, the earthquake was a distinctly singular experience, and, had it not been for the extraordinary violence of the shock between Gauhati and Sylhet, it would have ranked as quite a serious seismic disturbance.

The earthquake of August 15, 1950, with the epicentre at about 200 miles north of Sadiya, was one of the most disastrous earthquakes Assam had ever experienced. An area of 15,000 square miles including the district of Lakhimpur and Sibsagar suffered extensive damage in life and property. The earthquake was accompanied by such usual effects as fissures, subsidence, elevation of the ground, landslides and floods. The drainage of the country was changed considerably. The river beds silted up considerably. The Brahmaputra at Rangolikobo, a little below the junction of Dihing and Luhit, had silted up by 8 to 10 feet. At Dibrugarh the minimum low water level recorded was 325 in January, 1950 and 331.1 in January, 1951. At Neamati and Disangmukh, the water level appeared to be normal, but above Disangmukh it appeared to be appreciably higher indicating that silt had moved downwards. Silt was permanently deposited on the river beds, making navigation almost impossible. At Jorhat, hundreds of houses and many office buildings suffered damage. Near the town, a few places on the Assam Trunk Road itself subsided with cracks. The Jagannath Baruah Road was badly damaged. Slight damage was also caused to the Jorhat-Mariani Road. Fissures appeared in paddy fields and villages and muddy sands came out of them and damaged crops. A large number of tanks and ponds were filled up with sand causing difficulty in the supply of drinking water. At Sibsagar, heavy damage was caused to the jail, high school buildings and the police lock-up. The walls of the jail on the north and south collapsed and had to be renewed completely. The Disangmukh Road subsided in two places. The town was under water for 3 to 4 feet due to a breach on the right bund of the river Dikhow. The Siva temple, which withstood the 1897 shock creditably, cracked and tilted. Cattle, fish and wild animals died in great number.

So far as destructive hurricanes are concerned, it may be said that Sibsagar is not visited by them. But during the rains, a spell of hot dry weather is often followed by a thunder shower which immediately cools the air and on that account, is refreshingly welcome. Hailstorms occasionally do damage ; but fortunately they are of very local nature.

Climate and Rainfall

Sibsagar, like the rest of Assam, enjoys a cool winter and a not-very-hot spring. The climate of Assam is also characterised by a highly humid atmosphere and abundant rains. In October, the rain begins to stop and the nights grow a bit cooler. But the real cold weather does not set in till about the month of December and continues till the end of January. The winter season is followed by the season of severe thunder storms from March to May. The dry weather of the winter in the month of February may be some unforeseen light showers which sometimes last for two or three days.

One special feature in the climate of Sibsagar, as of other districts of Upper Assam, is that there is heavy rain in April and May, at a time when precipitation in Northern India is at a minimum. The copious rains of the early spring generally prevent the development of hot weather and make the nights fairly cool. From June, the climate becomes really unpleasant. The air is saturated with heavy moisture and the damp heat is very tiring indeed. The monsoon sets in the first week of June bringing heavy rains throughout the district. The monsoon lasts up to the beginning or middle of October. The heavy showers of the monsoon are welcomed by the cultivators who are fully dependent on it for their rice cultivation.

The average yearly rainfall, not only in this district but in the whole of Assam, does not materially vary in different years. The average rainfall in this district according to the report of the District Gazetteer is 2,197 m.m. (85.49"), but according to our collection from the Meteorologist and the Tea Gardens, it is found that the average rainfall in this district during the last decade i.e. from 1950 to 1960 was 2,324.94 m.m. which was a bit higher than the annual average recorded by the District Gazetteer of Sibsagar district. The record of annual average rainfall supplied by the Tocklai Tea Experimental Station of Jorhat is 2,041.99 m.m.

About 64% of the annual rainfall is received during the monsoon season, July being generally the month with the maximum rainfall. During the sixty year period 1901 to 1960, the highest rainfall amounting to 133% of the normal occurred in 1929, while 1914 was the year with the lowest rainfall which was only 80% of the normal.

On the average, there are about 119 rainy days (days with rainfall of 2.5 m.m. to 10 m.m. or more) in a year. This number varies from 94 at Barpathar to 132 at Attabari. The maximum rainfall in 24 hours recorded at any station in the district was 253.5 m.m. (9.98") at Golaghat in 1889, June 2.

The sky is generally heavily clouded to overcast during the south-west monsoon. In the winter, the sky is moderately clouded, but in the mornings of the winter months, the sky may be very foggy especially in riverine areas. During the period from March to May, moderate to heavily clouded sky is common.

Temperature

There are meteorological observation stations at Sibsagar, Jorhat and Golaghat. While the records of Sibsagar extended to long period of years, the observations at Golaghat and Jorhat were started only recently. The records of temperature and other meteorological conditions available for Sibsagar may be taken as representative of the conditions in the district in general. The cold season in this district starts from the end of November when both the day and night temperature begins to drop rapidly. January is the coldest month of the year when the mean daily minimum temperature generally comes below 11 degrees centigrade. In the year 1960, according to the report of the Sibsagar station, the mean daily minimum temperature in the month of January came down to the level of 8.6 degrees centigrade which was the lowest in the last decade. In January of the same year, the Tocklai Experimental Station recorded the lowest average minimum temperature of 7.5 degrees centigrade. In the month of January, the mean daily maximum temperature does not generally go above 23.3 degrees centigrade. Only in 1960 the mean maximum temperature came up to 24.5 degrees centigrade. The temperature begins to rise from about the beginning of March and in July and August it reaches the maximum. The mean daily maximum temperature varies from 31.3 degrees to 33.3 degrees centigrade.

The monsoon season is the period of highest temperature. The high percentage of moisture in the air

makes the weather very unpleasant, particularly in between the spells of rain. With the withdrawal of the south-west monsoon by about the second week of October, the weather gradually becomes very pleasant.

The highest maximum temperature recorded at Sibsagar was 42.8°C (109.1°F.) the 23rd May 1945 and the lowest minimum temperature was 2.8°C (37.0°F) on February 13, 1905.

Flora

The atmosphere is highly humid throughout the year. Botanically, the forests of Sibsagar can roughly be divided into two divisions - the tropical evergreen forests and the miscellaneous forests. The first category includes such variety as hollong, nagor, sam, amri, gunseroi, makai, sopa etc. In the second category such species are included whose top canopies are deciduous and the middle and lower canopies are evergreen in character. Qualitatively the latter forests are inferior to the former and they are composed of such species whose commercial value is negligible. The evergreen forests are also most picturesque to the eye, the miscellaneous forests being far from that. But the latter forests may in the long run transform into evergreen forests, if they remain unaffected by any biotic influence.

The evergreen forests, as the name suggests, are evergreen in character and are generally found in Dilli, Sapekhati, Geleky, Tiruhill, Disoi and Disoi Valley reserves. They are composed of many canopies, the top canopy being predominated by hollong which towers majestically over others with clean straight poles of nearly 100 feet length. In some reserves of Sibsagar subdivision, makai is also found associated with hollong in this canopy. Other species that tend to attain considerable heights in the top canopy are sam, sopa, gunseroi etc., but their occurrence is only sporadic in an otherwise gregarious crop of hollong and makai. Since they are confined only to better drained areas, in areas where drainage is poor they get themselves replaced by species like hollock, ajhar, urium etc. In the middle canopy of evergreen forests we generally find nahor and morhal. But there are also other species such as bandordima, bhomora, dhuna, jamu, hingori, jomari etc. Sometimes the species in this canopy are replaced by bamboos like kako, dalao and watai. In the lower canopy there is a variety of evergreen shrubs and herbs among which phutuka, gosh-bhedeli, gerukatamil, kawpat, tera, lengoo etc. predominate. Inferior quality canes are also not uncommon in the depressions and low-lying areas.

**Rhino in
Kaziranga — Sibsagar**

Tea Estate

The leafless period of deciduous species that are found abundantly in the top canopy of miscellaneous forests is considerably short. The most common tree in this canopy is bhelu which towers over the rest and grows to gigantic dimensions. But it has a poor stem on account of its large buttressing habit. Among other species that occur in this canopy are different kinds of sopa and sam intermingling in a lesser degree with bogipoma, gunseroi, bonsum etc. In the middle canopy, nahor, bandardima, dhuna, hingori, seleng, paroli and panimara also grow. Compared to evergreen forests, the under-growth here is lighter but climbers are found in greater profusion. Bamboos such as kako and dalo occur plentifully in higher areas.

The forests of Dhansiri Valley Division falling in Sibsagar district may conveniently be called moist deciduous riverine type of canes. However the evergreenness of this forest at certain places is such that they may be termed northern tropical semi-evergreen type instead. The terrain of this region being flat and interspaced by a series of mounds of varying height, the tree growth is confined to elevated grounds whereas the ill-drained interspaces contain luxuriantly growing canes like jati and tita. In the top canopy we find, ajhar, amari, bonsum, sam, urium etc., while in the middle canopy, ountenga overwhelms all others.

The species of Kaziranga Reserve represents savanna type which contains various kinds of grass such as ekra, nal, khagra etc. They generally grow in low-lying areas while in the higher plane sun grass holds its sway. Patches of koroï also occur here and there. Simlu grows profusely in over-grazed areas around the khutis along the southern bank of the Brahmaputra. A belt of mixed evergreen forest also occurs along the bank of Kaziranga from south-east to north-west. The belt generally harbours the wild rhinoceroses and elephants of the sanctuary.

Forest Belt

Another division can also be made of the forests of the district between Reserve Forests and Unclassed State Forests. Reserve Forests have been constituted under the provisions of the Assam Forest Regulation VII, 1891 by which the following acts are mainly prohibited :— (1) trespassing, or permitting cattle to trespass or allowing cattle to pasture ; (2) causing any damage by negligence in felling any tree or “cutting or dragging any timber” ; (3) any fresh clearance under the provisions of Section 7 ; (4) setting or kindling any fire in contravention of any rules made by the

Government so as to endanger the forests ; (5) felling, cutting, girdling, marking, lopping, tapping or causing injuries by fire or otherwise to any tree ; (6) quarrying stone, burning lime or charcoal or collections subject to any manufacturing process or removal of forest produce ; (7) cleaning or breaking up of land for any purpose and (8) poisoning water or in contravention to Government rules, hunting, shooting, fishing, setting of trap or snare. In 1901-03, the Reserve Forest covered an area of 876 square miles, but presently it has dwindled down to 737 square miles which comprise as many as twenty one reserves namely, Dilli, Sapekhati, Diroi, Doal, Geleky, Panidhing, Tiruhills, Disoi Valley, Disoi, Hallongapar, Kakodonga, Doyang, Upper Doigurung, Lower Doigurung, Nambor North, Pambari, Kaziranga, Nambor West, Nambor South, Diphu and Rangma. There are two forest divisions in the district of Sibsagar and Dhansiri. The latter includes the last named four reserves which have a total area of about 232 square miles. Among the reserves, the smallest is Sola with an area of only $2\frac{1}{2}$ square miles and the largest is Kaziranga which stretches over an area totalling 165 square miles. In Sibsagar division the reserves are situated on the southern part of the district while in Dhansiri division they form continuous belts around the river valleys.

Unclassed State Forests are managed under the provisions of Section 34 and 35 of the Assam Forest Regulation VII, 1891. Under these provisions no use of any forest produce in such land can be made except in accordance with the rules to be made by Government. To be brief, such forest is a simple Government waste land and does not necessarily possess any of the characteristics which are usually associated with the expression forest. It may be a sandy char or a huge expanse of low-lying land covered with high grass and reeds and almost totally destitute of trees. It may be a small piece of arable land which has been resigned by its former holder and has not yet been settled with any other person, or it may be, what its name would naturally suggest, actual tree forest. In 1902-03, such forest occupied an enormous area of 2839 square miles. But in 1956-57 the area was 307,251 acres in Sibsagar division and 190,459 in Dhansiri Valley division.

Fauna

In Sibsagar quite a large number of denizens of the sylvan world is conglomerated in the Kaziranga Wild Life Sanctuary. The exhibit par excellence of the sanctuary is the great Indian one-horned rhinoceros to be found generally wallowing in the mud of the swamps.

They are now estimated to be nearly 384 in the Sanctuary, the number having increased, thanks to protection given by the Government, from less than a score in the early thirties of this century. Another magnificent species, getting rarer in the rest of India, which can be seen here is the wild buffalo. While it is difficult to estimate their number, there may be more than 300 of them in the sanctuary. The wild bull buffaloes visit the tame cow-buffaloes of the professional graziers and the progeny of these commands a good price because of their great strength and, presumably, their great milk-yielding capacity. No tame male buffaloes can survive in this sanctuary. Another animal greatly increasing, but rare both in Assam and India, and which at one time became almost extinct in the sanctuary, is the swamp deer. Due to the special protection afforded in the last decade, their numbers have increased and there may be nearly a hundred of them in the sanctuary. A few herds of bison are there in the sanctuary. The number of wild elephants is not many and their stay in the sanctuary in general is seasonal, migration taking place to the neighbouring Mikir Hills. Countless number of hog deer are also there in the sanctuary and the number of wild pigs is even greater. It is not uncommon to see sounders of over fifty busy digging for roots on the fringes of the swamps. Tigers are definitely on the increase now and in a few instances they have become dangerous to the calves of the rhinoceros. A few leopards have been seen. As real tree jungle is of limited extent, the barking deer and sambhar deer, which like this type of forest, are not many in this sanctuary. Among other animals that are seen in the sanctuary, mention may be made of the Himalayan deer, jungle cats, civet cats and crab-eating mongese. Others that abound in the streams are the tortoise particularly on the banks of the Brahmaputra. Water-birds such as the whistling teal, snipe, adjutant, cormorants, black-billed storks and white-billed storks are in abundance. Different types of ducks are also seen as migratory birds in the season. Egrets follow the rhinos and are often found riding on them, picking off insects from their bodies.

From the above, it would be wrong to conclude that the species found in Kaziranga are absent in other parts of the district. Barring a few, such as rhinoceros, wild buffaloes, swamp ducks etc. most of the species, more particularly elephants and tigers, abound in the rest of the district also. Over and above these, other species found in the district are clouded leopard, black panther, sloth bear, spotted deer, pigmy hog, small civet cat, fishing cat, wild dog, monkey, langoor monkey, hoolook monkey,

ant eaters, hares, squirrel, mongoose, tiger and binturong. Among the reptiles found in the district mention may be made of crocodile, king cobra, lizard, monitor lizard and python. The names of the birds found in the district are pelican, crane, wild fowl, wild goose, wild duck, blue coot, green pigeon, imperial pigeon, parrot, partridge, quail, florican, black-face pheasant, peacock pheasant, tragophan pheasant, starlet and yellow mi and hornbill.

Elephant Catching

There are mainly two processes prevailing in the district for catching elephants. They are known as Mela Shikar and Kheda Shikar. In Mela Shikar, mahouts mounted on well-trained elephants pursue the herd which generally takes to flight. The task is of a most arduous and exciting character. The great animals crash through the thickest jungle and over rough and treacherous ground at a surprising pace, and the hunter is liable to be either torn by the thorny cane or swept down from his seat by the overhanging boughs. Two hunters single out a likely beast, drive their elephants on either side and deftly throw a noose over its neck. The two ends of the noose are firmly fastened to the kunkis, as the hunting elephants are called, and as they close in from both sides, the captured animal is unable to escape or do much injury to his captors who are generally considerably larger than their victim. The wild elephant is then brought back to camp where it is tied up for a time and gradually tamed. It is said that the system of Mela Shikar was introduced in the time of Purandar Singha.

The method of the Kheda Shikar is a simple one. In a very thick jungle, near a path regularly used by a herd of wild elephants, the trap of stockade is erected. It consists of a large circle of very strong and high fencing made of tree trunks firmly embedded in the ground and securely roped together. In order to strengthen this fence, a bulward of earth is thrown upon it on the outside to about the height of an elephant, and, at intervals, there are buttresses of wood. The entrance is a very strong gate, also made of tree trunks and large branches. Outside the gateway, on either side, there are barricades leading away from the stockade and away from each other to form a big funnel. These barricades should not be too obviously foreign to the surrounding jungle, so that the elephants do not notice them till it is too late.

When all is ready and a herd of wild elephants is reported to be approaching the area, men on tame elephants create a disturbance behind the wild elephants

and stampede the herd. In the ensuing excitement, the men drive the younger and smaller members of the herd into the funnel made by the two barricades. By the time the elephants realise that they are in a trap, it is too late, and the only opening they can see, free from men and noise and torches (made of burning branches) leads to the stockade, and the gate is crash-shut behind them. Every effort is made to exclude the large tusked as they are of no use for training and may cause unlimited trouble and danger.

Once the elephants are secured in the stockade, there is the difficult task of bringing them out and taking to the stockade camp, where they are tethered in the shade until such time as they can be taken to the training camp.

To tie up the wild elephant, a noose is slipped round its neck and the end is fastened to a strong tree whose bark has been removed and the trunk smoothed, so that the rope does not fray readily. The hind legs of the elephant are tied together, the rope being passed over a number of times from one leg to the other and then the rope is securely fastened to a tree behind the elephant. This is done in such a way that the elephant is unable to bring its hind legs well under its body, in which position it would break its bonds, and that the elephant is at a slight stretch all the time and gets therefore, tired much more quickly.

Early History of the Sibsagar District :

There are practically no records of the Sibsagar district before the advent of the Bodos or Boros. It is recorded in the Tantras that once Sibsagar formed a part of the great kingdom of Kamrupa. The eastern boundary of Kamrupa extended to the river Dikhu or Dikhow. It is said that the great sage Vasishta established his shrine on the upper hilly region of the Dikhow and named the river as Vasishta Ganga. E.A. Gait in his History of Assam writes that "The Indian King Samudra who according to Forlong was ruling in Upper Burma in 105 A.D. must have proceeded thither through Assam." In that case, king Samudra must have passed through Sibsagar. The Brahmaputra valley was known to the Buddhists of Eastern Asia as Weisali.

Further it can be inferred from some of the old ruins at Golaghat that these ruins belong to the pre-Kachari and pre-Ahom age.

Short History of the Kacharis :

Rev. Sidney Endle, in his account of the Kacharis, described the Kacharis as "the original autochthons of

Assam." About their origin, B. C. Allen wrote in 1905 in his District Gazetteer of Sibsagar, "these Kacharis belong to the great Bodo tribe, which is found not only in the valley of Brahmaputra, but in Garo Hills and in hills Tippera far to the south. They are thought to be a section of the Indo-Chinese race whose original headquarters are said to have been located in the inaccessible hills and valleys which conceal the sources of the Yang-tse-Kiang and Ho-ang-ho, and they seem to have gradually spread in successive waves of immigration over the great part of what is now known as the province of Assam." In early history of Kamrupa, it is stated that "these later Mongolians belong to the Tibeto-Burman family of Indo-Chinese group and their representatives of the present day are the Kacharis, Koches, Rabhas, Meches, Mikirs, Lalungs, Garos, Nagas, Kukis and Chutiyas of these the tribes speaking the Bodo or Boro language seem to have occupied the plains of Assam for a very long time."

Captain Fishers was of opinion that "the Bodo gradually acquired an empire over Assam, Sylhet, Mymensing and the valleys to the east of the Brahmaputra, their origin being at Kamarupa" - (Kachari Buranjis by Dr. S. K. Bhuyan). Thus it is seen that the major part of Assam and north-east Bengal formed a great Bodo Kingdom.

B. C. Allen in his District Gazetteer of Sibsagar mentioned that the history of the Kacharis in Sibsagar is vague and fragmentary - "they have left no annals of their rules." But in many histories written by the Ahom historians there are sufficient materials about their rules.

In the history of Assam, it is stated that the Kachari Kingdom was founded by one Manik and his son-in-law Rukata. The famous king of this dynasty was Bicharpati Pha or Vikramaditya Pha who extended his territory up to Namchang and Borhat of the present Sibsagar subdivision. He constructed two cities, namely Sonapur and Banpur, with two Siva Temples in each city somewhere within Sibsagar which have disappeared long ago. When the Ahoms invaded and conquered Assam in the early part of the thirteenth century, i.e. in 1228 A.D., they came into conflict with the powerful Kacharis. This part of the history of the Kacharis can be described as the history of constant conflict between the Ahoms and the Kacharis. They defeated the Ahoms on many occasions, but between 1375 and 1378, during the reign of the famous Ahom king Sulung-mung or Dihingia Raja, the Kacharis were pushed back up to the west bank of the Dikhow river. Gradually the Kacharis lost their territories of Namdang, Gabhoru, Negheri,

Dergaon, Dijna and Morangi. For a few years, the Dhansiri river became the boundary of the Ahom and Kachari Kingdoms. But afterwards the famous Kachari King Dersongpha was defeated and killed in severe fight by the Ahom general Phraseng Much on the bank of Dhansiri river and Dimapur, the grand brick and stone city of the Kacharis, fell into the hands of the Ahoms. The history of the Kacharis concerning Sib-sagar ends here.

The Kacharis were great builders of cities, forts, tanks and temples. traces of which still remain in Golaghat, North Cachar and Mikir Hills and Cachar district.

Short History of the Chutiyas :

Leaving aside mythology, which has got little value in history, the Chutiyas were the members of the great Bodo race.

Sir Edward Gait is of the opinion that "the Kacharis are believed to be very closely allied to the Koches and also, so far at least as language is concerned, to the Chutiyas."

They belonged to the Tibeto-Burman family of the great Indo-Chinese group like that of the Kacharis. According to Colonel Dalton, the Chutiyas were originally settled in the hilly regions near the Subansiri river. In course of time they became powerful and extended their influences over the petty states of the hills. The subsequent history of the Chutiyas forms part of the history of Sadiya and a portion of Lakhimpur district and has little connection with the district of Sibsagar. However they occupied a narrow strip of land up to the Soffrai river in this subdivision.

One Birbol, after conquering sixty families of Chutiyas near Sonaguri, established a small state on the North-east of Assam. After the death of his father, Ganri-narayan or Ratnadhwaipal conquered the Chutiyas living at Rangal Guri, Kalgiri, Nilgiri and Dhawalgiri hills and became a powerful king of this dynasty. He descended into the valley of the Brahmaputra and defeated king Bhadrasena and built a city at Majuli, called Ratnapur. Next he defeated king Nayapala and made alliances with the kings of Kamata and Gaur. The expedition against Kamata by Ratnadhwaipal, according to many historians, is doubtful. It is said that the king left his son to be educated at the court of Gaur. Unfortunately the prince expired there and his dead body was sent to his father. At that time the king was busy

with constructing a new city near Kundil river. He received the dead body of his son there and named the city as Sadiya (place of handing over a dead body) to commemorate the event.

After the death of Ratnadhwaipal, eight kings namely Vijoydhwaipal, Bikramdhwaipal, Gaurdhwaipal, Sankhadhwaipal, Jayadhwaipal, Karmadhwaipal and Dharmadhwaipal ruled over the Chutiya kingdom. The last king of this line Dharmadhwaipal gave his daughter, Sadhani, in marriage to a poor young Chutiya man and later on he resigned in favour of his son-in-law. This young man assumed the throne under the name of Nitipal. But he was quite unfit for such a job and during his short period of rule confusion and anarchy prevailed everywhere. This led to the downfall of the Chutiyas at the hands of the Ahoms. From the early periods there was a number of conflicts between the Ahoms and the Chutiyas in connection with the boundaries of their territories. The Ahom king Sutupha in about 1364 A.D. invaded the Chutiya kingdom but he was not successful and finally Sutupha was treacherously killed at the Saffrai river. His brother king Tawkhamthi invaded the territory of the Chutiyas and defeated their king. In or about 1523 A.D. during the reign of Suhungurung or Dihingia king, fresh war broke out. The Ahom generals Konchang and Frachangmuch subjugated the Chutiya Kingdom. Thus the rule of this dynasty ended.

The Chutiyas were great artists and they constructed many cities and shrines specially in the North-eastern corner of Assam. Like the Kacharis, they offered sacrifices to the goddess of Kachaikhati or Tamreswari in the copper temple. The history of the Chutiyas is also vague and fragmentary. They left no annals of their rules. The source of their rule is derived only from the history written by the Ahom historians.

The Morans and the Barahis :

The Morans and the Barahis were of Bodo origin and they ruled over a narrow strip of land near the hills. The Ahoms, under their leader Chao Sukapha, had to meet them in the plains portion of Sibsagar but easily gained over these clans and finally absorbed them into their own (Ahom) clan.

The chiefs of the Moran and Barahis, Badonshah and Thakuntha, were appointed as responsible officers of king Sukapha. It is said that they had to "marry the daughters of the Assam tribes and hence there was a large admixture of blood".

**Sibsagar Tank
Siva Temple in Background**

Bishnu Dol in Joysagar

Rang Ghar

Kareng Ghar

Talatal Ghar

It is stated in the Ahom Buranji that it is these people who gave the name Asom or Ahom to these newcomers.

Short History of the Ahoms :

The first part of the thirteenth century saw a great change in this part of the country with the entrance of the Ahoms. In 1228 A.D. the Mau branch of the Tai race founded the Ahom kingdom of Assam in Upper Assam.

The original home of the Tais according to Dr. Grierson was "north-western China between the upper course of the Yang-tse and the Hoang-ho". But according to George Scott, "south-western China was the original home of the Tais. Although there were linguistic and physical affinities between the Tais and the Chinese, the "History of the Southern Princes" by Yan-Tsai (afterwards translated by the French historian Monsieur Camille) says that "from the first mention in the Chinese history up to modern time the Tais have never been called Chinese either by themselves or by the Chinese".

The Tais first appeared in history in Yau-nan and from there they migrated into Upper Burma in the valley of Nam-Mao (Shweli River) during the sixth century A.D. From there they spread south-east over the present Shan States and north-wards into the Irrawaddy (Nam-khee) valley. While this branch of the Tais ruled in the valley of the Shweli river, they sent expeditions to many places and they overran the entire country sweeping Burma and Talaing.

Dalton, Robinson, Hutton and some other scholars, relying on the authority of Boileau Pemberton, say that the Shans invaded Assam in the eighth century. Dalton in his Descriptive Ethnology of Bengal 1872 states, "in the reign of Sukhanpha, the thirteenth sovereign of the empire of Pong (777 A.D.), his brother Samlonpha, who was the general of the forces, having subjugated Cachar, Tipperah and Manipur, pushed across the hills to the valley of the Brahmaputra and commenced there a series of conquests by which the Shans gradually reduced the whole country..". The Mao or Mau Shan kingdom is known to the historians of Manipur as the kingdom of Pong.

About 1228 A.D. a Tai prince called Chao-Sukapha (Chao-ka-Pha) entered this land through the Patkai Hills defeating the Nagas on the way and invaded and conquered Assam. The Morans and the Barahis who

ruled over a narrow strip of territory in Sibsagar were easily gained over by them. Sukapha then established his capital at the foot of Charaideo hill. Robinson's Assam Descriptive Accounts of 1841 says that Chukapha was the first to assume for himself and his people the name Ahom (the peerless) and to give the name now softened to Assam to the country.

The Ahoms had to face frequent wars from 1268 to 1497 A.D. mainly against the Naras, Kacharis, Chutiyas and Nagas, sometimes with success and sometimes with defeat during the reign of Sukhapha's twelve successors. The conflicts between the Kacharis and the Chutiyas have been briefly described in the preceding paragraphs.

The fourteenth Ahom king, Sargodeo Suhungmung or Dihingia Raja, who ruled from 1497 to 1539 A.D. was a powerful king. "The reign of this monarch", says Dr. S. K. Bhuyan in his History of Assam, "witnesses the marked expansion of Ahom power accompanied by the establishment in some degree of its sphere of influence in Bengal and even in Orissa". In the Imperial Gazetteer of India, page 1536, it is stated that, "his reign is memorable not only for the extirpation of the Chutiyas and the Kacharis rule from the valley of the Brahmaputra, and for acknowledgement of his supremacy by the Koch King, Biswa Singha, but also for the repulse of the Mohamedan expeditions." The Ahom king despatched a force up to the bank of the river Korotaya. The Ruler of Gaur (Bengal) presented his two daughters Harmoti and Darmoti in marriage to the Ahom king and made over a number of pargonas including Ghoraghat, Faridabad, Eghera and Sendur Pukhuria.. The Ahom general Saukham Ghar Sandikai fixed the boundary of the Ahom kingdom at Korotaya by digging a tank and constructing a temple on the bank of the river.

The next king Suklenmung or Gorgoyan Raja established his capital at Gorgaon. Then hostility between the Koches and the Ahoms broke out. The Koch forces were completely annihilated. The king sent Ahom forces to help the Nara king against the Mautaras (Burmese). During the reign of his successor, Sukhampha or Kora Raja, the Koch king Naranarayan and his brother Chilarai invaded the Ahom kingdom. The Ahoms were defeated, Gorgaon fell in the hands of the Koches and the king fled to the Naga Hills.

After his death his son, Suchenpha or Protap Singha's reign witnessed the inauguration of internal reforms and also of the growing influences of Hinduism. Hostility renewed between the Ahoms and the Kacharis

and the Ahoms were defeated at the hands of the prince Bhimbal Konger and he recovered his lost independence. The conflict with the Moguls continued for more than 25 years. The Ahoms obtained several victories over the Moguls and finally a treaty was concluded between the Ahom general Momai Tamuli and the Mogul commander Allayar Khan in 1638 A.D., fixing the boundary of the Ahom and Mogul territory.

During the reign of his son, Sutamla or Jayadhwaj Singha (1648-1663 A.D.), Hindu influences rapidly grew in the Ahom court. He established many shrines (satras) of the Vaishnavist cult and took sramana (saran) from a Brahmin preacher. Important events during his reign were the conflicts with the king of Koch Behar and the famous invasion of the Moguls under Nawab Mir Jumla. The Koches were defeated, and the Ahoms also were badly defeated and lost their possessions bit by bit at the hands of the Moguls. At last Mir Jumla occupied the Ahom capital Gorgaon and the Ahom king fled to the Naga Hills. The Mogul general established himself at the Ahom capital for some time but circumstances forced him to leave the Ahom territory. Francis Hamilton in his account of Assam says, "his army was so roughly handled by the enterprising and warlike Assamese, that he not only was compelled to make a precipitate retreat, but also to yield up a large part of the lands which had belonged to the Moslems before the invasion took place." The Assamese chronicles say that the harassment inflicted upon them forced the Moguls to conclude a treaty. According to the treaty, the Ahom king promised to pay the war indemnity and also to give an Ahom princess named Ramani Gabhoru to the Mogul Emperor. During this war some of the Assamese officers conspired against their own State and took the side of the Moguls. The Ahoms then lost Gauhati.

King Chupungmung or Chakradhwar Singha was determined to recover the lost territory from the Moguls. In the final battle between the Rajput general Rajah Ram Singha and Lachit Borphukan, the viceroy of Lower Assam at Saraighat, near Gauhati, the Moguls were badly defeated and were forced to leave Assam.

After this glorious chapter of the Ahom history, reign of conspiracies, executions and murder began, and continued for about eleven years from 1670 A.D. to 1681 A.D. During this period the ministers and some of the low-graded officials became more powerful. More than seven kings had to lose their lives untimely besides a numberless royal princes and nobles, including princess Joymati. The Moguls, taking advantage of these events, occupied Gauhati again.

With the accession of Supat-Pha alias Godadhar Singha in 1681 A.D. the period of chaos and disorder in the Ahom dominion came to an end. Godadhar Singha expelled the Moguls out of the Ahom kingdom and this was the last attempt of the Moguls to reign in Assam. He despatched expeditions against the Mikirs and the Nagas and subdued them. A series of reforms were introduced in the State.

After the death of Godadhar Singha, his son Sukhrangpha alias Rudra Singha, came to the throne in 1695 A.D. Mr. B. C. Allen in his District Gazetteer of Sibsagar says that the "zenith of the Ahom power was reached in the reign of Rudra Singha. During his reign the subjugation of Cachar and Jaintia was completed in 1708 A.D. The Nagas were brought under control. Thus the Ahoms seemed to have dominated not only the whole of the valley of the Brahmaputra but the outer hills as well. King Rudra Singha planned to invade Bengal and before launching his expedition he tried to obtain the cooperation of the Hindu states of Bengal and other parts of India. Then he formed a Hindu confederacy against the Moguls in the eastern zone of India. His outlook was broad and it was to some extent an all-India outlook. He brought many changes to the social, religious and political life of Assam. His dream of conquest of Bengal was not fulfilled due to his death."

During the reign of his son Siva Singha, religious and administrative reforms were undertaken and public works such as the construction of tanks, temples, roads etc. were carried on. After his death his three brothers, Promatta Singha, Rajeswar Singha and Lakshmi Singha ruled the kingdom one after another. No major events happened during their time except the sending of an expedition against the Burmese who had then invaded Manipur. King Rajeswar Singha made alliance with the Manipuri King Jaisingha and a Manipuri princess, named Kuranga Nayani, was offered to the king of Assam. Other petty conflicts with the kings of Cachar, Jaintia, Khyrim and the Daflas were easily overcome by the Ahoms during these periods.

The reign of Lakshmi Singha was signalised by the outbreak of a serious civil rebellion known as the Moamaria Insurrection which continued for more than thirty years covering the reign of three kings. The cause of this insurrection was deep-rooted, mixing with religion and politics. The Ahom kingdom was now also hastening to ruins. The strength of the hostiles increased day by day. The royal forces were defeated on many occasions and at last the king was driven out

of Rangpur. However the revolt was subdued. In 1780 A.D. king Lakshmi Singha expired and his son Gaurinath Singha succeeded to the throne. During his reign, the revolt broke out anew and took a serious turn. The royal party at first met with some measure of success. But about 1786, the rebels under one Bharat Singh inflicted a decisive defeat upon the Ahom army and the king had to flee to Gauhati. At last having thrown himself on the protection of Lord Cornwallis the British sent Captain Welsh with a strong force, who restored Gaurinath Singha to the throne. Afterwards King Gaurinath transferred his capital to Disoi (Jorhat). In an Ahom chronicle it is stated that the Mataks harried the temples and the idols of the gods and put to death all the sons and daughters of our people. For a great length of time our countrymen had no homes, some took shelter in Bengal, some in Burma, some in the Dafla Hills and others in the forts of the Buragohain, who was fighting with the Mataks for years together. The King was able to keep his insurgents in check with the help of the army trained on the English system. The King died and Kamaleswar Singha succeeded him in 1795 A.D. King Kamaleswar Singha tried his best to restore the lost prestige of the Ahom dominion. The Daflas were repulsed and the Bengal freebooters were expelled. The final victory over the Moamarias and the Khamtis was then achieved.

The next king Chandrakanta Singha saw the complete downfall of the Ahom dominion. Due to suspicion and envy among the viceroy of Gauhati, Badan Borphukan and the chief minister Purnananda Buragohain, the Burmese invaded Assam. Thrice the Burmese, known in Assam as "Maan" invaded this country. Mr. B. C. Allen in his District Gazetteer says that "the Burmese were guilty of gross atrocities during their occupation of the country, the villages were plundered and burnt, and the people were compelled to seek shelter in the jungles. Women who fell into their hands were violated with every circumstances of brutality and the miseries of the unfortunate Assamese were extreme". The three kings, Chandrakanta Singha, Purandar Singha and Jogneswar Singha became puppet kings at the hands of the nobles, the Burmese and the British. The country was depopulated of more than half of the population which had already been thinned by successive civil wars.

In such a dilapidated condition of the state, king Purandar entreated the Agent of the East India Company to help him with a few armies. "He was prepared either to pay tribute or to cede a part of his kingdom if British troops assisted him in regaining his throne." Similar appeals were sent by the ex-prime minister of

Assam to the British in Calcutta. But these were rejected on the ground of the then non-intervention policy of the British in India. King Chandrakanta also repeatedly requested the British authority to help him, which were refused. Now the Burmese become the master of Assam which the British did not like at all. So they at once interfered in the affairs of Assam and issued a proclamation asking the co-operation of the Assamese to drive out the Burmese. They also assured that the British Government would re-establish in Assam a government adapted to their needs and calculated to ensure the happiness of all classes. In 1824, the British declared war against the Burmese with the co-operation of the Assamese, and the Burmese were driven out of Assam. Soon after the commencement of the war against the Burmese, the agents of the East India Company decided that the districts of Upper Assam conquered from the Burmese should be treated as enemy territory under British occupations and under British administration. In the treaty between the Burmese and the British on the 24th February 1826 at Yandabo in Burma Assam was annexed to the British colony.

Population :

According to the Census of 1961, the total population of the district is 1,508,390 of whom 808,935 are males and 699,455 are females. This shows an increase of population of 296,166 over the 1951 Census. The percentage increase of population during 1951-1961 is 24.43. The percentage decennial growths are 15.57, 19.06, 13.38, 11.48 and 16.51 for 1911, 1921, 1931, 1941 and 1951 respectively. The period from 1951 to 1961 has shown the highest decennial growth compared to the earlier decades. This big rise in population in the district is mainly due to better health facilities i.e. low death rate, and the influx of people from inside and outside the State of Assam as skilled and unskilled labourers who have joined in different factories particularly in oil drilling work and the tea gardens of this district. Refugees from Pakistan have also partly added to the population in this district. At present the district occupies the fourth place in regard to population among all the districts of the State.

The density of population in the 1961 Census is 434 persons per square mile as against 351 in 1951. The density of population per square mile was 173.200, 238, 270, and 301 in 1901, 1911, 1921, 1931 and 1941 respectively. From the above figures it is seen that the density has been going up at a very good pace. During the last 50 years the density has increased by 117 per cent

The population in 1961 of the three subdivisions, viz. Jorhat, Sibsagar and Golaghat is 547,342; 547,716 and 413,332 respectively. In the last decade the population of the Jorhat subdivision has increased by 25.92 per cent, the Sibsagar subdivision records an increase of 23.36 per cent and the Golaghat subdivision registers an increase of 23.92 per cent.

The district consists of eleven police stations of which four are in the Sibsagar subdivision, four in the Jorhat subdivision and three in the Golaghat subdivision. The Jorhat and the Nazira police stations are the most thickly populated areas in this district. Amguri police station of the Sibsagar subdivision is the smallest among all the police stations in this district, but in regard to density it claims the third place among the others. The density of Nazira police station being 612 with an area of 207 square miles. It is the densest police station of the Sibsagar subdivision and occupies the second place among all the police stations of the district. The police station of Sibsagar with an area of 315.0 square miles stands as the third biggest police station of the district and holds 546 persons per square mile. The percentage increase of population is 22.81 during the last decade. The Sonari police station with an area of 357 square miles is the third biggest police station in this district, which has registered a marked increase of 30.13 per cent over 1951. The density of population of this police station which was only 365 per square mile in 1951 has gone up to 464 during the last ten years. The Majuli police station of the Jorhat subdivision is the second biggest police station of this district with an area of 359 square miles and a density of 223 persons per square mile. The Jorhat police station with a density of 826 persons per square mile is the most thickly populated area of the district with an area of 311 square miles. The rate of increase of population in this police station during the last decade is 27.12 per cent. The Teok police station of the Jorhat subdivision is also a densely populated area. It shows an increase of population by 18.53 per cent during the last decade. The Titabor police station comprising an area of 236 square miles has a density of 483 persons per square mile. The Bokakhat and the Dergaon police stations of the Golaghat subdivision with areas of 251 and 227 square miles hold the density of 207 and 495 persons per square mile respectively. The Golaghat police station is the biggest among the police stations of this district with an area of 885 square miles although it has ceded an area of 103 square miles of its territory in November 1951 to the newly constituted district of United Mikir and North Cachar Hills. According to its present boundary

the density of population is only 281 per square mile.

The total urban population of this district in 1951 was 39,319 which was only 3.24 per cent of the total population. But in 1961, the total urban population is 76,705 which is only 5.08 per cent of the total district population. The percentage of urban population recorded in 1901, 1911, 1921, 1931 and 1941 was 1.83, 2.29, 2.21, 2.48 and 2.70 respectively. The trend towards urbanisation in this district seems to be very slow as it signifies an increase of only 5.08 per cent against 3.24 per cent in 1951. But even this increase is mainly due to the declaration of two new towns, namely Dergaon and Mariani with a total population of 17,037 in 1961. If this figure be excluded from the total urban population, the real increase would come to a lower level during the last decade.

In the year 1901, the population of Jorhat town was only 2,899, which gradually increased to 5,231; 6,626; 8,334; 11,664; 16,164 and 24,953 in the subsequent decennial censuses.

Economic Development :

The economic position of the district of Sibsagar is in general fairly high in comparison with that of the other districts of Assam. The per capita income of this district in 1960 was Rs. 346. It occupies the third place in this regard among the other districts. Lakhimpur district occupies the first place with a per capita income of Rs. 417 which is immediately followed by the United Khasi & Jaintia Hills. The tea industry plays a significant role in augmenting the economic progress of the district. After independence many small-scale and subsidiary industries have been installed in different parts of the district.

Sibsagar, like other parts of the State of Assam, is also an agro-industrial district. The soil of this district is quite soft and sandy. It has a climate which is characterised by a highly humid atmosphere and abundant rains which accelerates the growth of agricultural crops and vegetables. Water is always plenty for use in cultivation. These factors naturally help bring a good harvest every year. The low lands of this district are mainly used for the cultivation of rice. The yellow sandy banks of the Red River are carpeted with pulses and vegetables. In the very low lands, considerable quantity of jute cultivation is to be seen in different parts. Nearly 2,212 acres of lands are cultivated only with jute. The total area under food-crops is nearly 630,519 acres. The cost of cultivation is comparatively low due to the

Sugar Mill — Dergaon
(Courtesy — Publicity, Assam)

high fertility of cultivable lands and the natural irrigation from the regular monsoon. But these gifts of nature make the cultivators very lethargic. Had they worked hard they could have produced double the amount of their present agricultural produce. Generally in the winter season, the paddy fields are lying barren without any crops. This inactiveness of the cultivators and the absence of any subsidiary rural industries account for the low standard of living of the rural people.

During the two Five Year Plans, the Government has given a good support to the agricultural sector of this district. The Assam Agricultural College at Borbheta, near Jorhat Town, has produced a large number of agricultural graduates who are devoting their energy to the development of agriculture. There is one Agricultural School near the Agriculture College where the students are taught the new methods of cultivation and other allied matters of agriculture. The Government has set up a model farm at Borbheta for agricultural research work.

During the Second Plan period, agricultural schemes were worked out on a seven point integrated programme laying emphasis on the supply of improved plants and seeds, water supply, crop protection, double cropping, reclamation and proper utilisation of water lands and better farming practices. Since Independence, the district has been making a steady headway in respect of agricultural production. The seven point integrated programme of the Grow-More-Food Campaign for stepping up food production was laid down by the Department of Agriculture in 1949-50. It consists of the following schemes :—

1. Seed-Multiplication and Distribution Schemes consisting of the following :—

(a) Multiplication and distribution of seeds for covering the intensive cultivation areas under improved crops.

(b) A District Seed Farm Scheme financed from the State Revenue for production of nucleus seed.

(c) Horticultural Development Scheme with district nurseries for the supply of plants, grafts and suckers of fruit plants and a fruit Technological Laboratory at Gauhati for the processing of surplus fruits.

2. Manure Manufacturing and Distribution Scheme consisting of the following :—

(a) Production of Compost manure from town refuse in Municipal areas.

(b) Production of Compost manure on a large scale in rural areas which ceased to be eligible for subsidy from the year 1952-53.

(c) Provision and distribution of bone-meal.

(d) Provision and distribution of oil-cake.

(e) Arrangement for making sulphate of ammonia available for cultivators.

3. Irrigation Schemes.

4. Plant Protection Scheme consisting of the following :—

(a) The scheme for the control of pest and diseases in the field and during storage.

(b) The scheme for the control of wild animals which cause damage to crops in fields.

5. Application of better farming practices consisting of putting across the results obtained in the Research Station of the Development and ensuring their adoption by cultivators.

6. Scheme for utilisation of waste lands and mechanical cultivation comprising of the following :—

(a) Land reclamation in selected localities through mechanised cultivation.

(b) The Garden Lands Utilisation Scheme.

(c) Utilisation of Tea Garden Surplus Lands.

(d) Loan Scheme.

7. Double cropping and Mixed Cropping Cultural Operations. Considerable importance was laid on the increased production of cash crops in the entire State.

Supply of irrigated water to the cultivated fields is of vital importance for the gearing up of agricultural products and the Government has taken a considerable effort for this purpose. In the Second Plan period about 1,500 acres of lands were brought under irrigation with a total cost of Rs. 1.40 lakhs. No district-wise records of irrigation schemes have yet been available under the Third Plan period.

The part played by the Co-operative Movement towards economic development in this district is worth mentioning. In 1951-52, about 94 Primary Agricultural Credit Societies were set up with a strength of 4,932 members. In 1960-61, the number of Credit Societies rose to 438 with a total membership of 23,342 persons. Rs. 48,000 were granted to the cultivators in 1951-52 as short term loans, but in 1960-61 it reached Rs. 3.68 lakhs. Long term loans given to the cultivators were

Rs. 1.50 lakhs in the year 1960-61. The number of Primary Co-operative Marketing Societies in this district was 15 in the year 1961. In the same year 1,230 members were serving under the Primary Agricultural Credit Societies.

The first major industry that was set up during the Second Plan period in this district was the Assam Co-operative Sugar Mills Ltd. at Baraubamuni Gaon. The Society was registered during the year 1956 and the mill commenced its first crushing from the year 1958-59. The Government has contributed a sum of Rs. 27 lakhs as share capital. The mill obtained Rs. 60 lakhs from the Industrial Finance Corporation of India and the public also contributed about Rs. 13 lakhs towards its share capital.

During the Second Plan, Government has altogether sanctioned 23.71 lakhs of rupees for the development of agriculture. The district-wise allotment of monetary help by the Government in the Third Plan is not available in the Department of Agriculture. In the Second Plan period, 8 godowns for the storing of agricultural crops have been set up in different centres.

The highlands of this district are covered with ever-green tea gardens. The tea industry is an old and well established industry and can be considered as the economic barometer of Assam and an important foreign exchange earner of the country. The majority of the tea gardens are owned by the British people and only a few of them are owned and managed by the local planters. Indianisation has however taken place gradually. The total area under tea plantation in this district is about 110,372 acres. More than 160,000 labourers are engaged in the tea industry of this district. There are 183 tea manufacturing factories with about 15,580 average daily workers.

An important activity based on the tea industry is the production of plywood tea chests. This is today a thriving industry in this district. Messrs. Wood Craft (Assam) at Mariani is producing ply-wood since 1955 with the annual installed capacity of 21,300,000 sft. About 123 daily workers are engaged in this industry. Besides this, the industry is producing chip boards with the capacity of 1,700 tons a year.

This district has made some industrial progress during the last decade. About 40 big rice mills of this district with a total working force of about 291 daily are producing a big quantity of rice. There are altogether 13 factories manufacturing wood and cork over and above

the manufacture of furniture, with a total strength of about 255 daily labourers. Only 4 printing presses of this district with a strength of 69 workers are registered under the Indian Factory Act. The Brahmaputra Match Factory at Jorhat is a medium industry producing chemical products and giving employment to 76 workers. The Assam Valley Flour Mill at Sibsagar Town which started its operation in 1959 has an annual installed capacity of producing 12,000 tons of flour. There are about 500 small and medium factories in this district employing about 35,406 daily workers.

It would be quite unjust on our part, if we do not mention the contribution rendered by the forest products in this district towards the economic progress. There are many Government as well as private forests where we can see more than 100 species of timbers. Out of them only about 35 species are generally used for plywood, match, furniture-making, railway-sleepers and carriages, making boxes, telegraph, telephone and electric transmission poles. Despite the fact that timber has so largely been displaced by iron and steel, it has not been fully displaced. In Assam, timber will continue to hold its own for still a considerable time to come. At present we are in acute shortage of iron and steel, and so very great emphasis is being placed on finding substitute materials like bamboo, timber and lime for building construction. With scientific treatment and processing, timber and bamboo can come in handy in this drive. In the consumption of timber for general purposes, the following six species alone represent more than 75 per cent of the total supply :—

1. Sal (*Shorea robusta*)
2. Hollong (*Dipterocarpur marcocarpus*)
3. Hollock (*Terminalia myriocarpa*)
4. Simul (*Bambax malabaricum*)
5. Cham (*Artocarpus chaplasha*)
6. Makai (*Shorea Assamica*)

The main use for timber in Assam is in the production of railway sleepers. Sal is mainly used for this along with a great deal of Hollong, Hollock and Makai, but these species should be conserved for nobler uses in the veneer industry substituting them by other inferior but none-the-less highly suitable species.

Assam has probably the biggest resources for the paper pulp, rayon pulp and board industry in India and Sibsagar has a significant contribution in this regard. As many as 50 species of bamboo occur in this district which can be used for diverse purposes. It is now mainly used in buildings, for walls and roofings. Bamboo is

also used for umbrella handles, walking sticks, tool handles, fishing rods, tent poles, ladders, baskets, toys, handfans, furniture and various other domestic and agricultural implements. All these articles can be produced on a cottage and small scale basis with small machineries.

In the two Five Year Plan period, the Government has made some estimates to raise the forest products. In the Second Plan, about 75 acres of matchwood plantation had been completed in this district. 397.5 acres of forest lands have been regenerated in the same period. 40 acres of land were planted with cane. Khoir plantation occupied only 61 acres in the Second Plan. Rs. 576,070 were spent in this district for the development of forestry. No district-wise breakdown of expenditure and improvement of forestry is available for the First Plan period.

Fisheries :

The development of fisheries taken up by the Government in this district is of recent origin. The Fishery Department is primarily concerned with increasing the fish production in the State through piscicultural practice. The development and exploitation of natural fisheries come within the purview of the Revenue Department which has, however, now started to entrust unproductive or derelict fisheries to the Fishery Department for improvement. At the initial stage, this Department was mainly concerned with the location of fish breeding centres for collection of fish seeds and stocking them in tanks both departmentally and through private parties. Even now the private fisheries are dominating the major parts of the market all around. It is difficult to get adequate information regarding the production and income of the private parties. A rough information can only be got through the records of the Government Fisheries.

During the First and Second Five Year Plan periods, the following Schemes were taken up for implementation.

1. Department Fish Farming
2. Fish seed collection and distribution
3. Renovation of old and ancient tanks
4. Reclamation of natural fisheries
5. Development of forest fisheries
6. Conservation and legislation
7. Survey of fisheries
8. Issue of loans
9. Development and organisation of Fishermen's Co-operative and marketing of fish and fishery products.

10. Training and research.

A rough idea of the development of fisheries in this district as furnished by the Superintendent of Fisheries, Sibsagar district, is given below :—

In the Golaghat subdivision, there are one registered river fishery and twenty eight registered beel fisheries. In addition, there are some old tanks and small beels covering a pisciculturable area of nearly 600 acres.

The Brahmaputra runs along the northern boundary of the Jorhat subdivision. There are in all twenty five registered river fisheries and thirteen registered beel fisheries. The total culturable area in this subdivision is estimated to be approximately 400 acres.

In the Sibsagar subdivision there are in all four registered fisheries and thirty three registered beel fisheries. The total culturable area is estimated to be about 1000 acres.

The tables given below give the full details of the development of fisheries in this district.

TABLE A

Area under pisciculture by the end of 1960-61 (Pond Culture)

| | | | |
|-----------------|-----------|----------|-----------|
| 1. Departmental | 32 acres | Sibsagar | 20 acres |
| | | Golaghat | 5 „ |
| | | Jorhat | 7 „ |
| 2. Private | 240 acres | Sibsagar | 100 acres |
| | | Golaghat | 80 „ |
| | | Jorhat | 60 „ |

TABLE B

Area (culturable) lying fallow by the end of 1960-61.

| | | | |
|------------|------------|----------|-----------|
| Total area | 1728 acres | Jorhat | 333 acres |
| | | Golaghat | 515 „ |
| | | Sibsagar | 880 „ |

TABLE C

Level of development at the end of the (I) 2nd Plan and visualised for the (II) 3rd Plan.

- (I) 40% of available resources estimated.
(II) 90% of available resources estimated.

The development of pisciculture in this district was launched with the establishment of seed collection centres and survey of culturable areas during 1948. Seed collection centres were first confined to the Nazira and Joysagar Fish Farms, and then they were extended to the Jorhat and Golaghat subdivisions in 1956 and 1958 respectively. After the success of the induced breeding operation in this district since 1958, the seed collection centres are gradually abolished.

At present the vital functions of this department (in this district) are as follows :—

(i) Seed Production—Through induced breeding operation the department is producing and distributing quality seeds to meet to the protein demand of this district.

(ii) Fish Farming—By producing and disposing of the marketable fishes this department is going to take a firm step to earn revenue and encourage the people on that line. Average total production of this district (including riverine and beel fisheries) annually stands at 9,990 maunds and the per capita consumption is 28 ounces daily. The total revenue stands as Rs. 215,598.

(iii) Assistance to Fishermen's Co-operative Societies— There are in all eleven registered Co-operatives in this district. To reclaim the derelict fisheries and improvement of pisciculturable area, this department is giving them financial help and technical guidance.

(iv) Survey—Survey of inland waters.

(v) Financial help—To help establish piscicultural

projects, loans are also sanctioned to the deserving parties. There are in all 7 loanees during the first two Plans.

(vi) A research centre has also been established at Joysagar during the year 1950-51 with a view to find out remedial measures to some problems that stand against the growth of pisciculture. This institute is working in collaboration with a Research Unit of the Central Fisheries Department of the Government of India. Selected matriculates are awarded stipends of Rs. 40 per month each and are imparted training in this Institute for finally appointing them as Fishery Demonstrators and Supervisors under the State Fisheries Department. Candidates deputed from Nagaland, Tripura, NEFA and Manipur also receive training here. The trainees are imparted training in various aspects of Pisciculture, Fishery Biology, Fishery Technology, Fish Laws and Marketing and also on the basic principles of Engineering and Survey required for survey and construction of tanks etc. They are also taught net-making and boat-making. The duration of the course is one year. There is another short course for six months for the training of Gram-Sevaks in piscicultural operations.

One Research Officer has been appointed by the State Government recently during the current year and posted at Joysagar. He is now doing preliminary work on Plankton study and culture of Plankton by using different raw materials. The Research work will also include the finding of optimum conditions for the growth of fish by using different types of food and manure. The general growth of fish in the State is found to be very poor due to the very low content of total alkalinity in water compared with other States of India.

INTRODUCING THE STATISTICS

The All-India Census Publications published by the Union Government contain data only down to the level of a district in some cases, or to the level of a police station in other cases. Data regarding each village cannot be had from the Central Government Census Publications. But the data down to the level of a village are very essential for the purposes of the State Government and the administration in the districts and subdivisions. So for the first time, the District Census Handbooks were compiled and printed for each district of Assam in 1951. The editing and compilation was done by the Superintendent of Census Operations, but the printing and expenditure thereof was borne by the State Government. The District Census Handbooks have become very popular ever since, because they are needed not only by Government and the Deputy Commissioners and Subdivisional Officers, but also by the Local Bodies and the general public. They are absolutely essential for the purposes of delimitation of constituencies, the establishment of panchayats, the determination of quota of civil supplies, the establishment of police stations and many other administrative matters required by the State Government. It has, therefore, been decided that in the 1961 Census also, the District Census Handbooks should be edited and compiled by the Superintendent of Census Operations and printed at the cost of the Government of Assam.

The Primary Census Abstracts given in the 1951 Census will now appear in the form of Village Directories which not only give detailed Census data for each village, but they also give such other informations as the existence of communication facilities, drinking water facilities educational facilities, Scheduled Castes and Scheduled Tribes and the different categories of workers. The Village Directories also give us the area in acres of each village, if the village has been cadastrally surveyed and if the area figure is available, and they also give us the number of literates and the number of workers classified according to the nine categories of the Standard Industrial Classification adopted by the Government of India. Such informations are furnished for each village and for each block of a ward of a town. Thus the Directory furnishes information on the primary economic activities of each village or ward of a town and the literacy proportion of the population. This abstract is

useful therefore not only for the State Government and the Local Bodies for their administrative purposes but they are also in great demand by various Ministries of the Union Government like the Ministry of Education, Ministry of Labour and Employment, Ministry of Food and Agriculture and the Planning Commission. These data are also required for all sample surveys, both rural and urban, based on villages or wards of a town. The District Census Handbooks also contain tables on mother tongue, religion and the various tables specially prepared for Scheduled Tribes and Scheduled Castes of each district. Official statistics relating to vital statistics, statistics of household and small-scale industries, administrative statistics and other statistics relating to various activities of Government, especially those connected with the First and Second Five Year Plans, have also been given. There is therefore no doubt that the District Census Handbooks of the 1961 Census will furnish most of the data that are required for administrative as well as for planning and development purposes.

Before 1951, the population was classified by religion ; but at the 1951 Census, the economic classification was substituted for the classification based on religion. In 1951, the people had been divided into two broad livelihood categories, namely the agricultural classes and the non-agricultural classes, and these two classes had again been sub-divided into four classes each. Each of the eight livelihood classes was again divided into three sub-classes with reference to their economic status, namely—

- (i) Self—supporting Persons ;
- (ii) Non-earning Dependants ; and
- (iii) Earning Dependants.

In the 1961 Census, the classification based on livelihood has been done away with and the basis of the classification now is WORK. People have been divided into two classes, the Workers and Non-Workers. The working population has been divided into nine categories of workers namely —

- I. Working as Cultivator.
- II. Working as Agricultural Labourer.
- III. Worker in mining, quarrying, livestock, forestry, fishing, hunting and plantation, orchards and allied activities.

- IV. Working at Household Industry.
- V. Working in manufacturing other than Household Industry.
- VI. Working in Construction.
- VII. Working in Trade and Commerce.
- VIII. Working in Transport, Storage and Communications.
- IX. Working in other Services.

The working population has been classified separately according to the returns relating to occupation and industry. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely Industrial nor an Occupational Classification of the population, but it was a combination of both. There were only 10 divisions and 88 subdivisions of Industries and Services. In the 1961 Census, the National Classification of Industries and Occupation adopted by the Government of India was also used for the Census and there were more than 300 occupational families and 300 industrial minor groups for which figures are given for the total population sex-wise. Another unique feature of the 1961 Census is that all these Economic Tables are prepared on the basis of the principal work of a person.

Non-Workers have again been classified into eight categories as follows :—

1. A full-time student or child attending school who does no other works, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.
2. A person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.
3. A dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.
5. A beggar, vagrant or independent woman with-

out indication of source of income and others of unspecified source of existence.

6. A convict in jail (an undertrial prisoner is shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

In the 1951 Census, the population was shown according to certain units known as Census Tracts. These Tracts were selected by the Superintendent of Census Operations on an ad hoc basis and they may constitute one Police Station, two Police Stations or even three Police Stations and they may also consists of part of a Police Station only. Urban areas of each district were treated as separate Tracts in the 1951 Census. In the 1961 Census, I have taken Police Stations only as unit of Census Divisions and so all census data were given down to the level of a Police Station. The exception is that urban areas were treated as separate entities for the subdivision.

ABBREVIATIONS OR NOTATIONS USED IN THE VILLAGE DIRECTORY

As all details cannot be given in the Village Directory, certain abbreviations and notations were used for the sake of easy reproduction and printing. The following notations were therefore used in the village Directory.

NOTATIONS

1. Transport and Postal Facilities

| | | | |
|-------|----------------------------------|---|--------|
| (i) | Road |) | |
| | Bridle Path |) | 'R' |
| | Metalled Road |) | |
| | Tarred Road |) | |
| (ii) | Railway | | 'Rly' |
| (iii) | Postal Facilities | | |
| | Branch Post Office | | 'B.O' |
| | Sub-Post Office | | 'S.O' |
| | Extra Departmental Branch Office | | 'Edbo' |

Extra Departmental Sub-Office 'Edso'
Central Sub-Office 'CSO'

(iii) If the adult male population in non-agricultural livelihoods is at least 75 per cent of the total male population.

2. Educational Institutions

- | | |
|---|-----|
| (i) Primary, Basic, Tol, Muktab Night, Nursery School | 'P' |
| (ii) Middle School (M.E. & M.V.) | 'M' |
| (iii) High School or Higher Secondary | 'H' |
| (iv) Higher Institutions including Colleges. | 'C' |
| (v) Technical Institutions | 'T' |

3. Drinking Water Supply

- | | |
|--|-------|
| (i) Tanks or Beels | 'Tk' |
| (ii) Kacha well | 'Kw' |
| (iii) Pipes and Tube wells or Ring wells | 'S' |
| (vi) Pucca well | 'Pw' |
| (v) River, Running Stream or Springs | 'Riv' |

P.S Distance of the items is considered up to five miles.

4. Bazar Day and Medical Facilities

- | | |
|--------------------|-------|
| (i) Weekly Bazar | 'Wb' |
| (ii) Daily Bazar | 'Db' |
| (iii) Dispensaries | 'D' |
| (iv) Hospitals | 'Hos' |

5. Veterinary Facilities and whether the village is covered by Community Development or National Extension Service Blocks

- | | |
|--------------------------------|-------|
| (i) Government Veterinary) | |
| (ii) Private Veterinary) | 'V' |
| (iii) Other Methods) | |
| (iv) Community Development | 'Cd' |
| (v) National Extension Service | 'Nes' |

DEFINITIONS

The following definitions used in the 1961 Census are reproduced below for easy reference :—

1. **Town** :— For the purpose of the 1961 Census, a town means a Municipality, a Town Committee, or a Cantonment and any other area having the following urban characteristics :

- (i) If the population is not less than 5,000.
- (ii) If the density is not less than 1,000 per square mile.

2. **Village** :— In Assam a village means a cadastral village where there has been a cadastral survey. In the Plains districts where there has been no cadastral survey, it is taken to be a gaon together with its adjacent 'tolas', 'paras' etc. provided that none of these independent collections of houses are so large or so distant from the cadastral village, with distinct individual names. In the Hills districts, the most convenient definition of a village is that it is a collection of houses bearing a separate name and situated with certain boundaries traditionally recognised by the villagers.

3. **House** :— It is a structure or part of a structure inhabited or vacant or a dwelling, shop, a shop-cum-dwelling or a place of business, workshop, school etc. with a separate entrance.

4. **Household** :— It is a group of persons who commonly live together and take their meals from a common mess or kitchen unless the exigencies of work prevent any one of them from doing so.

5. **Scheduled Tribes** :— They are members of the backward tribes who generally occupy the hilly areas or other rather inaccessible parts of the Indian Union. They are generally very backward and so the Government of India has prepared a schedule of such tribes for the purpose of giving them facilities in education and employment so that they may come up to the level of the other advanced people of India as soon as possible. Scheduled Tribes may belong to any religion.

6. **Scheduled Castes** :— They belong to the lowest rung of the castes of the Hindu and Sikh religions. In order to help them rise to the level of other more advanced societies in India, the Government has made a schedule of such people. Hence the name Scheduled Castes.

7. **Houseless persons** :— They are people who have no houses to dwell and generally live in pavements or open places, such as beggars, who beg in people's houses by day and sleep under the trees by night.

8. **Institutional population** :— They are people who are inmates of institutions, like hostels, boardings, jails etc.

9. **Worker** :— Is a person who is working as a cultivator, an agricultural labourer, at a household

industry or he may be doing any other work but he must earn some income. Work includes not only actual work but also effective supervision and direction of work.

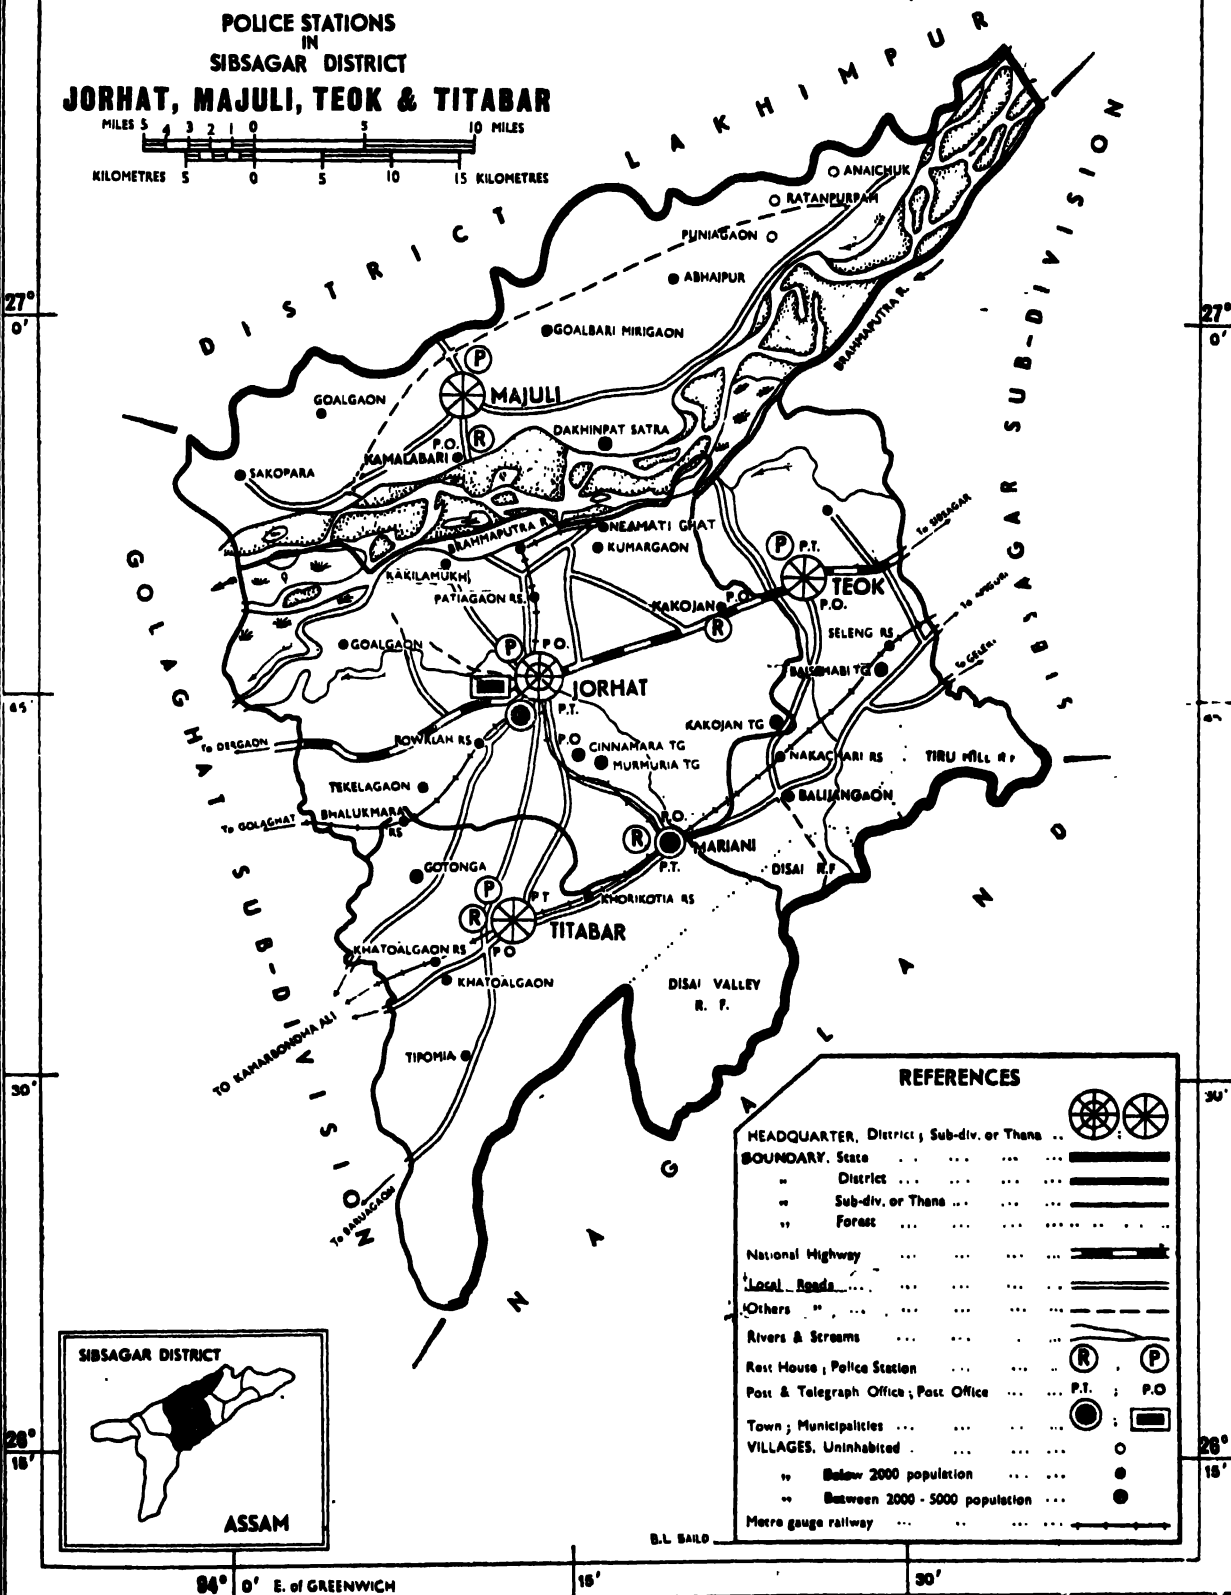

10. **Non-Worker** :— Is a person who is either not doing any work or who does some work from which he does not earn any income. For example, a pensioner and a renter who earn some income but if they do not do any other work they are classified as non-workers. On the contrary students and housewives may be doing some work either in school or in the house but as they do not earn any income they are classified as non-workers for the purpose of the Census.

11. **Cultivator** :—For purposes of the Census a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in (a)

cultivation of land or supervision or direction of cultivation of land owned or held from Government.

12. **Agricultural Labourer** :— Is a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation for wages in case, kind or share, such as share of produce. The labourer should have no right or lease or contract on land which he works nor should he be responsible for taking decision as to which crops to sow and when or taking the risk of cultivation. A share of the produce goes to him only as Wages.

13. **Household Industry** :—A household industry is defined as an industry conducted by the head of the household himself or mainly by members of the household at home or within the village in rural areas and only at home in urban areas.

TABLES

Besides the Village Directory which contains the Primary Census Abstracts for each village in the district in addition to other important informations relating to the village, all A series tables with their appendices relating to the general population ; all B(i) i.e. General Economic tables except B-II ; all C series i.e., Social and Cultural tables except C-I, C-IV & C-VI ; and special tables for Scheduled Castes and Scheduled Tribes—SCT-I, SCT-II, SCT-III, SCT-IV and SC-I, ST-I and ST-II are reproduced in this volume. A short explanatory note for each of the above census tables presented in this volume is also given.

Table A-I : Area, Houses and Population

This is the basic population table for the Census. This table furnishes the data for each police station and town separately. The area is given both in square miles and square kilometres; but the density is calculated from square miles only. In addition to the data on area and density, this table gives the number of inhabited and uninhabited villages, occupied residential houses and the population separately for males and females according to the 1961 Census for both rural and urban areas separately.

The area figures of the district and police stations are as supplied by the Director of Land Records and Surveys, Government of Assam. The area figures of the towns are collected from the respective Deputy Commissioners and Subdivisional Officers, Local Bodies and, in some cases, from the Local Self-Government Department of the Government of Assam.

Appendix I to Table A-I :

This appendix shows the 1951 territories constituting the present set-up of the district.

Appendix II to Table A-I :

This appendix shows the number of villages in the district with a population of 5,000 and over which are not declared as towns because they do not satisfy all the three criteria required for their treatment as towns.

Appendix III to Table A-I :

This table furnishes the figures for houseless and institutional population for total, rural and urban areas separately. For the purpose of studying different characteristics, this population is included in the household population.

A-I AREA, HOUSES AND POPULATION

Note :— 1. The sq. km. and density figures of Urban areas of Police Station/Subdivision/District are worked out using the area figures corrected upto 2 places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this, the area figures relating to Sq. Km. are further adjusted to make the Police Station/Subdivision/ District totals tally.

2. Towns treated as such for the first time in 1961 are printed in italics.

3. The following abbreviations have been used for the status of a town :—

- (i) M—Municipality
- (ii) T. C.—Town Committee.

A-I AREA, HOUSES**APPENDIX****Statement Showing 1951 Territorial Units**

1. Only those names/areas which have undergone changes since 1951 have been shown below.
2. The Location Code Number, revenue number, name and area of each Village (Whatever-available) transferred from one Police Station to another or incorporated in a Police Station by transfer from another is given in the Annexure 1.

TABLE A-II : VARIATION IN POPULATION DURING SIXTY YEARS

This table furnishes population data for the last seven Censuses from 1901 to 1961 and the variation of population in each decade. This is a very important table as it gives the growth of population from decade to decade and in the absence of reliable vital statistical data, forms the main source for estimation of population. One of the main changes in this table since the last Census is that percentage variation is given from decade to decade.

| DISTRICT | Year | Persons | Decade variation | Percentage decade variation | Males | Females |
|----------|------|-----------|------------------|-----------------------------|---------|---------|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| SIBSAGAR | 1901 | 598,251 | .. | .. | 316,968 | 281,283 |
| | 1911 | 691,402 | + 93,151 | + 15.57 | 365,131 | 326,271 |
| | 1921 | 823,197 | + 131,795 | + 19.06 | 433,913 | 389,284 |
| | 1931 | 933,326 | + 110,129 | + 13.38 | 496,288 | 437,038 |
| | 1941 | 1,040,428 | + 107,102 | + 11.48 | 552,737 | 487,691 |
| | 1951 | 1,212,224 | + 171,796 | + 16.51 | 647,932 | 564,292 |
| | 1961 | 1,508,390 | + 296,166 | + 24.43 | 808,935 | 699,455 |

TABLE A-III : VILLAGES CLASSIFIED BY POPULATION

This table gives figures for the number and population of villages in the various population groups which are less than 200, 200- 499, 500-999, 1000-1999, 2000-4999, 5000-9999 and 10,000 and above. The group less than 500 of the last Census has been split up into two groups, namely less than 200 and 200-499.

| District/Subdivision/Police Station | Total number of Inhabited Villages | Total Rural Population | | I—Villages with less than 2,000 population | | | | | | | | | |
|-------------------------------------|------------------------------------|------------------------|---------------|--|---------|------------|---------|--------|------------|---------|-------|---------|------------|
| | | Persons | Less than 200 | | 200—499 | | 500—999 | | | | | | |
| | | | Males | Females | Number | Population | | Number | Population | | Males | Females | Population |
| | | | | | | Males | Females | | Males | Females | | | |

A-IV-TOWNS (AND TOWN GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

This table gives the growth of each town since 1901. This table furnishes the areas of the towns of the 1961 Census both in square miles and square kilometres. For the purpose of this table, all towns are divided into 6 classes according to population. As in Table A-II, the percentage variation of each town is given from decade to decade.

| | | Class I 100,000 and above Class II 50,000-99,999 | Class III 20,000-49,999 Class IV 10,000-19,999 | Class V 5,000-9,999 Class VI less than 5,000 | | | | |
|--------------------------------------|-------------------------------------|---|---|---|---------------------|-----------------------------------|--------|---------|

B—GENERAL ECONOMIC TABLES

B-1—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This table is prepared separately for rural and urban population and it gives the total population classifying the nine industrial categories of workers and non-workers. Each category is divided into five age-groups namely, 0—14, 15—34, 35—59, 60+ and Age not stated. This is the basic economic table. The classification of workers and non-workers by age groups is a special feature of the 1961 Census. The age groups correspond to the different stages of life which have special significance with reference to capacity to work, namely, children, young persons, middle-aged persons and elderly persons.

TABLE B-IV

**Industrial classification of persons at work other than at cultivation
by sex and class of worker**

This table corresponds more or less to the Union Table B-III of the 1951 Census.

It divides the working population, other than persons at work in cultivation, industrially into nine Divisions, forty five Major Groups, 343 Minor Groups and into four statuses of employment. The Indian Census Economic classification adopted at the 1951 Census was neither a purely industrial nor occupational classification of the population but was a combination of both. There were only ten divisions and eighty eight subdivisions of industries and services. The present classification follows the National classification of Industries adopted by the Government of India with some suitable minor modifications within the framework. This table deals only with the industrial classification of workers. The workers at Household Industries are classified into two employment statuses, namely, Employee and Others. The workers in non-household industries etc., are classified by the four statuses of employment, namely, Employer, Employee, Single worker and Family worker against Employer, Employee and Independent worker in the 1951 Census. An Employer is a person who has to employ other persons in order to carry on the business from which he secures his livelihood. He is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others is not an employer, even if he has the power to employ another person (s) in his office on behalf of his own employer (s).

An Employee is a person who usually works under some other person for salary or wages in cash or kind. Persons employed as Manager, Superintendents, Agents etc., and in that capacity employ or control other workers on behalf of their own employers are only employees.

A Single Worker is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn

does not employ anybody else, not even members of his household except casually. This definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is treated as a single worker.

A Family Worker is a member who works without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of this definition, members of family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relatives.

This table has three parts. Part A restricts itself to an account solely of persons at work at Household Industry. It presents data for employee and others only for major groups separately for total, rural and urban.

Part B deals with the persons at work in non-household industry, trade, business, profession or service by four statuses of employment only for total and urban. This part of the table also gives data only for major groups.

Part C of the table furnishes data for each minor group of the Industrial Classification in respect of persons at work other than cultivation for total and urban. It does not classify the workers by status of employment.

This is a very important economic table as it gives the employment position in various sectors of the economy.

Explanation of the codes, according to the Indian Standard Industrial Classification, used in the table are given below:-

STANDARD INDUSTRIAL CLASSIFICATION

DIVISION 0 : AGRICULTURE, LIVESTOCK, FORETRY, FISHING AND HUNTING

| Major Group | Description | Minor Group |
|-------------|---|-------------|
| 00 | Field Produce & Plantation Crops | |
| | Production of crops (including vegetables) not covered by production of cereal crops (including bengal gram), pulses, yarns, oilseeds, sugarcane and other cash crops | 005 |
| | Production of fruits and nuts in plantations, vines and orchards | 006 |
| | Production of wood, bamboo, cane reeds, thatching grass, etc. | 007 |
| | Production of other agricultural produce (including fruits & nuts not covered by Code No. 006 and flowers) not covered above | 009 |
| 01 | Plantation Crops | |
| | Production of tea in plantation | 010 |
| | Production of plantation crops other than coffee, rubber, tobacco, ganja, cinchona and opium. | 015 |
| 02 | Forestry and Logging | |
| | Planting, replanting and conservation of forests | 020 |
| | Felling and cutting of trees and transportation of logs | 021 |
| | Preparation of timber | 022 |
| | Production of fuel including charcoal by exploitation of forest | 023 |
| | Production and gathering of other forest products not covered above | 026 |
| 03 | Fishing | |
| | Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries | 031 |
| 04 | Livestock and Hunting | |
| | Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat | 040 |
| | Production of ducks, hens and other small birds, eggs by rearing and poultry farming | 043 |

DIVISION : I MINING AND QUARRYING

| | | |
|----|---|-----|
| 10 | Mining and Quarrying | |
| | Mining of coal | 100 |
| | Mining of crude petroleum and natural gas | 106 |
| | Quarrying of stone (including slate), clay, sand, gravel, limestone | 107 |

DIVISION 2&3: MANUFACTURING

| | | |
|----|--|-----|
| 20 | Food Stuffs | |
| | Production of rice, ata, flour etc. by milling, dehusking and processing of crops and foodgrains | 200 |
| | Production of sugar and syrup from sugar cane in mills | 201 |
| | Production of indigenous sugar, gur from sugar cane or plum juice and production of candy | 202 |
| | Slaughtering preservation of meat and fish and canning of fish | 204 |

DIVISION 2 & 3: MANUFACTURING (Continued)

| Major Group | Description | Minor Group |
|-------------|---|-------------|
| | Production of bread, biscuits, cake and other bakery products | 205 |
| | Production of butter, ghee, cheese and other dairy products | 206 |
| | Production of edible fats and oil (other than hydrogenated oil) | 207 |
| | Production of other food products such as sweatmeat and condiments, muri, murki, chira, kholi, cocoa, chocolate toffee, lozenge | 209 |
| 21 | Beverages | |
| | Production of distilled spirits, wines, liquor from alcoholic, malt, fruits and malts in distillery and brewery | 210 |
| | Production of country liquor | 211 |
| | Production of indigenous liquor such as toddy, liquor from mahua, palm juice | 212 |
| | Production of aerated and mineral water | 214 |
| | Production of ice-cream | 216 |
| | Processing of tea in factories | 217 |
| 22 | Tobacco Products | |
| | Manufacture of bidi | 220 |
| | Manufacture of hookah tobacco | 223 |
| | Manufacture of other tobacco products | 226 |
| 23 | Textiles-Cotton | |
| | Cotton ginning cleaning, pressing and baling | 230 |
| | Cotton spinning (other than in mills) | 231 |
| | Cotton dyeing, bleaching | 233 |
| | Cotton weaving in power looms | 234 |
| | Cotton weaving in handlooms | 235 |
| | Manufacturing of khadi textile in handlooms | 236 |
| | Printing of cotton textile | 237 |
| | Manufacturing of cotton nets | 238 |
| | Manufacturing of cotton, cordage, rope and twine | 239 |
| 24 | Textile-Jute | |
| | Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta | 244 |
| 25 | Textile-Wool | |
| | Embroidery and art work in woollen textile | 256 |
| 26 | Textile-Silk | |
| | Spinning of silk other than in mills | 262 |
| | Weaving of silk textile by handloom | 264 |
| | Printing of silk textile | 265 |
| 27 | Textile-Miscellaneous | |
| | Manufacture of carpet and all other similar type of textile products | 270 |
| | Manufacture of hosiery and other knitted fabrics and garments | 271 |
| | Embroidery and making of crepe lace and fringes | 272 |
| | Making of textile garments including rain coats and headgear | 273 |
| | Manufacture of made-up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags | 274 |
| | Manufacture of umbrellas | 278 |
| 28 | Manufacture of Wood and Wooden Products | |
| | Sawing and planing of wood | 280 |

| DIVISION 2 & 3: MANUFACTURING (Continued) | | |
|---|---|-------------|
| Major Group | Description | Minor Group |
| | Manufacture of wooden furniture and fixtures | 281 |
| | Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows | 282 |
| | Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures | 283 |
| | Manufacture of other wooden products such as utensils, toys artwares | 284 |
| | Manufacture of veneer and plywood | 285 |
| | Manufacture of plywood products such as tea chest | 286 |
| | Manufacture of boxes and packing cases other than plywood | 287 |
| | Manufacture of materials from cork, bamboo, cane, leaves and other allied products | 288 |
| | Manufacture of other wood and allied products not covered above | 289 |
| 29 | Paper and Paper Products | |
| | Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper & paper board—handmade | 291 |
| | Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp | 292 |
| 30 | Printing and Publishing | |
| | Printing and publishing of newspapers and periodicals | 300 |
| | Printing and publishing of books | 301 |
| | All other types of printing including lithography, engraving, etching, block making and other works connected with printing industry | 302 |
| | All types of binding, stitching, sizing and other allied work connected with binding industry | 303 |
| 31 | Leather and Leather Products | |
| | Currying, tanning and finishing of hides and skins and preparation of finished leather | 310 |
| | Manufacture of shoes and other leather footwear | 311 |
| | Manufacture of leather products (except those covered by code no. 311 and manufacture of clothing and wearing apparel (except footwear made of leather and fur), such as leather upholstery, suit-cases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles | 313 |
| | Repair of shoes & other leather footwear | 314 |
| 32 | Rubber, Petroleum and Coal Products | |
| | Manufacture of tyres and tubes | 320 |
| | Manufacture of rubber footwear | 321 |
| | Production of petroleum, kerosene and other petroleum products in petroleum refineries | 324 |
| | Production of coaltar and coke oven | 325 |
| | Manufacture of other coal and coaltar products not covered elsewhere | 326 |
| 33 | Chemicals and Chemical Products | |
| | Manufacture of matches | 334 |
| | Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap | 335 |
| | Manufacture of soap and other washing and cleaning compounds | 336 |
| | Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats) | 339 |
| 34-35 | Non-Metallic Mineral Products Other Than Petroleum and Coal | |
| | Manufacture of structural clay products such as brick, tile | 340 |
| | Manufacture of lime | 342 |
| | Manufacture of structural stone goods, stone dressing and stone crushing | 343 |
| | Manufacture of stone wares other than images | 344 |

| DIVISION 2 & 3: MANUFACTURING (Continued) | | |
|---|---|-------------|
| Major Group | Description | Minor Group |
| | Manufacture of plaster of paris and its products | 346 |
| | Manufacture of earthenware and earthen pottery | 350 |
| | Manufacture of chinaware and crockery | 351 |
| | Manufacture of earthen image, busts and statues | 355 |
| | Manufacture of earthen toys and artwares except those covered by code No. 355 | 356 |
| 36 | Basic Metals and Their Products Excepts Machinery and Transport Equipment | |
| | Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods | 360 |
| | Manufacture of armaments | 362 |
| | Manufacture of structural steel products such as joist, rail, sheet, plate | 363 |
| | Manufacture of iron and steel furniture | 364 |
| | Manufacture of brass and bell metal products | 365 |
| | Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can. | 367 |
| | Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products | 368 |
| 37 | Machinery (All Kinds Other Than Transport and Electrical Equipment) | |
| | Manufacture and assembling of machinery other than electrical, except textile machinery | 370 |
| | Manufacture of machine tools | 372 |
| | Manufacture of electric machinery and apparatus, appliances not specified above | 379 |
| 38 | Transport Equipment | |
| | Manufacture and assembling of motor vehicles of all types (excepting motor engines) | 382 |
| | Manufacture of motor vehicle engines, parts and accessories | 383 |
| | Repairing and servicing of motor vehicles | 384 |
| | Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear | 385 |
| | Repairing of bicycles and tricycles | 388 |
| | Manufacture of other transport equipments such as animal drawn and hand drawn vehicles | 389 |
| 39 | Miscellaneous Manufacturing Industries | |
| | Assembling and repairing of watches and clocks | 392 |
| | Manufacture of jewellery, silverware and ware using gold and other precious metal | 393 |
| | Manufacture and tuning of musical instruments | 394 |
| | Manufacture and repair work of goods not assignable to any other group | 399 |

| | Retail trading in tobacco, bidi, cigarettes and other tobacco products | 644 |
| | Retail trading in fuel such as coke, coal, firewood and kerosene | 645 |
| | Retail trading in food stuffs like sweetmeat, condiments, cakes, biscuits, etc. | 646 |
| | Retail trading in animals | 647 |
| | Retail trading in straw and fodder | 648 |
| | Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textile and hosiery products : (this includes retail trading in piece-goods of cotton, wool, silk and other textiles) | 650 |
| | Retail trading in toilet goods, perfumes and cosmetics | 651 |
| | Retail trading in medicines and chemicals | 652 |
| | Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals | 653 |
| | Retail trading in tyres, tube and allied rubber products | 654 |
| | Retail trading in petrol, mobiloil and allied products | 655 |
| | Retail trading in wooden, steel and other metallic furniture and fittings | 660 |
| | Retail trading in stationery goods and paper | 661 |
| | Retail trading in metal, porcelain and glass utensils | 662 |
| | Retail trading in earthenware and earthen toys | 663 |
| | Retail trading in other household equipments not covered above | 664 |
| | Retail trading in bricks, tile and other building materials | 670 |
| | Retail trading in hardware and sanitary equipments | 671 |
| | Retail trading in wood, bamboo cane, bark and thatches | 672 |
| | Retail trading in other building materials | 673 |
| | Retail trading in agricultural and industrial machinery equipments, tools and appliances | 680 |
| | Retail trading in transport and storage equipments | 681 |
| | Retail trading in electrical goods like electric fan, bulb | 682 |
| | Retail trading in skins, leather and furs and their products excluding footwear and headgear | 683 |
| | Retail trading in clock & watch, eye glass, frame | 684 |
| | Retail trading in precious stones and jewellery | 686 |

DIVISION 6 : TRADE AND COMMERCE (Continued)

| Major Group | Description | Minor Group |
|-------------|---|-------------|
| | Retail trading in musical instruments, gramophone records, pictures and paintings including curio dealing | 687 |
| | Book-selling | 688 |
| | Retail trading in goods unspecified | 689 |
| 69 | Trade and Commerce Miscellaneous | |
| | Real estate and properties | 691 |
| | Providents and insurances | 693 |
| | Money lending (indigenous) | 694 |
| | Banking and similar type financial operation | 695 |
| | Distribution of motion pictures | 697 |
| | All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw etc. | 699 |

DIVISION 7 : TRANSPORT, STORAGE AND COMMUNICATION

| | | |
|-------|--|-----|
| 70-71 | Transport | |
| | Transporting by railways | 700 |
| | Transporting by tramway and bus service | 701 |
| | Transporting by motor vehicles (other than omnibus) | 702 |
| | Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka | 703 |
| | Animal transporting by animals such as horses, elephant, mule, camel | 704 |
| | Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving | 705 |
| | Transporting by boat, steamer, ferry etc., by river, canal | 706 |
| | Transporting by air | 708 |
| | Transporting by other means not covered above | 709 |
| | Services incidental to transport such as packing, crating travel agency | 710 |
| 72 | Storage and Ware Housing | |
| | Operation of storage such as ware-houses | 720 |
| | Operation of storage such as cold storage | 721 |
| 73 | Communication | |
| | Postal, telegraphic, wireless and signal communications | 730 |
| | Telephone communication | 731 |
| | Information and broadcasting | 732 |

DIVISION 8 : SERVICES

| | | |
|----|--|-----|
| 80 | Public Service (This does not include Govt., Quasi Govt. or local body activities, other than administrative in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industrial groups) | |
| | Public service in police | 803 |
| | Public service in administrative departments and offices of Central Government | 804 |
| | Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards etc. | 805 |
| | Public service in administrative departments and offices of State Governments | 809 |

APPENDIX TO TABLE B-IV PART C

Minor groups having less than 1% of workers of the respective Division (Less than 0.5% in case of minor groups of Division 2 & 3), have been shown in this Appendix.

The following abbreviations have been used :-

H. I. — Household Industry
N H I — Non-Household Industry
M — Males
F — Females

B V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This is a new table for the 1961 Census. As discussed earlier in case of table B-IV, the classification adopted at the 1951 Census was a combination of industrial and occupational. Two separate tables are therefore prepared on the basis of industry and occupation of the workers.

This table classifies the workers other than at cultivation into 11 Occupational Divisions, 75 Groups and 331 Families according to their occupations. This classification follows the National Classification of Occupations adopted with minor modifications within the framework. It gives data for each family of the National Classification of Occupations separately for total and urban and for persons, males and females, and thus brings out the distribution of occupations among males and females.

SIBSAGAR DISTRICT

Families having less than 1% of the workers of the respective Division, (less than 0.5% in case of families of Division 7-8), have not been shown in this table but are given in the appendix to this table. Divisions thus affected are marked with an asterisk(*).

| Division, Group and family | | Total Workers | | | | | | | Division, Group and family | | Total Workers | | | | | | |

APPENDIX TO TABLE B—V

Families having less than 1% of workers of the respective Division, (less than 0.5 % in case of families of Division 7—8), have been shown in this appendix. The following abbreviations have been used :—

| | |
|---|---|
| III — In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and | VI — In Construction |
| IV — At Household Industry | VII — In Trade and Commerce |
| V — In Manufacturing other than Household Industry | VIII — In Transport, Storage and Communications |
| M — Males | IX — In Other Services |
| | F — Females |

TABLE B—VII

Part A of this table shows persons working principally (i) as Cultivators or (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer.

Part B of this table shows the Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged at Household Industry.

Table B-VII is prepared separately for total, rural and urban population. Part A of the table is a cross tabulation in the case of persons whose principal and secondary works are any two of (i) Cultivation, (ii) Agricultural Labour and (iii) Household Industry. This table is important as it shows the extent to which cultivation is supplemented by household industry or vice versa.

Part B of Table B-VII gives data in the case of persons who are principally engaged at Non-household Industry etc. and also engaged in Household Industry as a secondary work.

Description of the Divisions and Major Groups appearing in the table is given below :—

DIVISION 0 : AGRICULTURE, LIVESTOCK, FORESTRY, FISHING & HUNTING

| | | | |
|-------------|----|---|------------------------------------|
| Major Group | 00 | : | Field Produce and Plantation crops |
| " | 01 | : | Plantation crops |
| " | 02 | : | Forestry and Logging |
| " | 03 | : | Fishing |
| " | 04 | : | Livestock and Hunting |

DIVISION 2 & 3 : MANUFACTURING

| | | | |
|---|-------|---|--|
| " | 20 | : | Food stuffs |
| " | 23 | : | Textile-cotton |
| " | 25 | : | Textile-wool |
| " | 26 | : | Textile-silk |
| " | 27 | : | Textile-miscellaneous |
| " | 28 | : | Manufacture of wood and wooden products |
| " | 31 | : | Leather and leather products |
| " | 33 | : | Chemicals and chemical products |
| " | 34-35 | : | Non-Metallic Mineral products other than petroleum and coal |
| " | 36 | : | Basic Metals and their products except machinery and transport equipment |
| " | 39 | : | Miscellaneous Manufacturing Industries |

DIVISION 4 : CONSTRUCTION

| | | | |
|-------------|----|---|--------------|
| Major Group | 40 | : | Construction |
|-------------|----|---|--------------|

DIVISION 6 : TRADE AND COMMERCE

| | | | |
|-------------|-------|---|-----------------|
| Major Group | 60-63 | : | Wholesale Trade |
| " | 64-68 | : | Retail Trade |

DIVISION 8 : SERVICES

| | | | |
|-------------|----|---|--|
| Major Group | 80 | : | Public Services |
| " | 81 | : | Educational and Scientific Services |
| " | 86 | : | Community Services and Trade and Labour Associations |

B-VII PART A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

TABLE B-VIII

This table shows the persons unemployed aged 15 and over by sex, broad age-groups and educational levels.

Part A of the table relates to urban areas. This is a classification of unemployed persons by their educational levels and age-groups. This is prepared separately for those who are seeking employment for the first time and for those who were employed before but are now out of employment and seeking work. In the first case, the age-groups are 15-19, 20-24, 25-29, 30-34, 35 + and Age not stated and in the second case, 15-19, 20-24, 25-34, 35-44, 45-59 60 + and Age not stated. This table will throw light on educated unemployed for purposes of planning for employment and also for assessing the available man-power.

Part B of this table relates to rural areas. In this table educational levels for total unemployed persons are given. The educational levels are limited to Illiterate, Lite rate (without educational level), Primary or Junior Basic and Matriculation and above as in Table B-III Part B.

TABLE B-IX

This table shows the persons not at work classified by sex, broad age-groups and type of activity.

This table is prepared separately for total, rural and urban population. It relates to the non-working population. The non-workers are divided into eight categories given in the table according to their activities. This kind of tabulation was never attempted before, nor were questions asked on the activities of non-workers.

The eight categories are based on recommendations of the United Nations. This table makes the data available separately for those who have an earning without working. Separate data are also available in respect of housewives, who though they do domestic work, are not classified as economically active. Separate data are also available for School-attending children which may be useful to the Education Department. There is a category which consists of all other dependents including children and disabled persons.

B-IX-PERSONS NOT AT WORK CLASSIFIED BY SEX

C—SOCIAL AND CULTURAL TABLES

This table is prepared separately for total, rural and urban population. This is a very important demographic table. The age-groups conform to the international requirements. From this table, it can be ascertained whether proportions in the various marital statuses have increased or decreased since last Census and whether any trend is observed in the age of marriage. This table which was prepared on a 10% sample at the 1951 Census is prepared on full count at the present Census.

C-II--AGE AND MARITAL STATUS

| Age-group | Total Rural Urban | Marital Status | | | | | | | | | | | | | | |

TABLE C-III

This table is prepared separately in three parts for total, rural and urban population. There are five yearly age-groups up to 34, and other age-groups are 35-44, 45-59, 60+ and Age not stated. While in the previous Censuses, only the total literate population for different age-groups was given, at the present Census, data for broad educational levels are also given. The educational levels are different for rural and urban areas as given in Table B-III

C-III PART A—AGE, SEX AND EDUCATION IN ALL AREAS

SIBSAGAR DISTRICT

| Age-group | Total population | | | Illiterate | | | | Literate (without educational level) | | | | Educational levels | | | |
|----------------|------------------|---------|---------|------------|---------|---------|---------|--------------------------------------|--------|---------|-------|-------------------------|---------|-------------------------|---------|

TABLE C-VIII
SCHEDULED CASTES AND SCHEDULED TRIBES
Classification by literacy and industrial category of workers and non-workers among
Scheduled Castes/Scheduled Tribes

This table is presented in two parts-Part A relating to Scheduled Castes and Part B relating to Scheduled Tribes. It is prepared separately for total, rural and urban population. This table gives the total population of Scheduled Castes and Scheduled Tribes separately and their distribution by literacy and classification of workers into different industrial categories and the total number of non-workers. Literacy figures of Scheduled Castes and Scheduled Tribes are given for the first time in the present Census. This table is important as it will be the basis for the allocation of Reserved Seats in Parliament and the State Legislatures.

PART—A

Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Castes

246

TABLE SCT-I
Industrial classification of persons at work and non-workers by sex for Scheduled Castes and Scheduled Tribes

SCT-I Tables are prepared in two parts. Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes

This table is prepared for each Scheduled Caste and Scheduled Tribe. This table gives the population of each Scheduled Caste and Scheduled Tribe separately, for rural and urban, and will also show in which sectors of industry members of each Scheduled Caste and Scheduled Tribe are working. Data have also been given on the un-wholesome occupations in which the members of Scheduled Castes are working. The population figures of each individual caste and tribe are often required for welfare and other work.

SCT-I PART A—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS
BY SEX FOR SCHEDULED CASTES

**SCT-II—AGE AND MARITAL STATUS FOR
SCHEDULED CASTES AND SCHEDULED
TRIBES**

This is an important demographic table corresponding to table C-II but it gives data for the total population only. The age-groups are restricted to 0-14, 15-44, 45+ and Age Not Stated. At present demographic data are not at all available in respect of these communities. This table thus fulfils a very useful role. The age and marital status data give an indication whether the population belonging to Scheduled Castes/Scheduled Tribes is decreasing, stable or increasing.

TABLE SCT-III
**EDUCATION FOR SCHEDULED CASTES/
SCHEDULED TRIBES**

This table is prepared for each Scheduled Caste and Scheduled Tribe and separately for rural and urban population. It gives the literacy and educational levels for each Scheduled Caste and Scheduled Tribe. In the case of urban areas, data are given for educational levels as in Table B-III, Part A. In the case of rural areas, data are given only for mere literates, primary or Junior Basic and Matriculation and above as in Table B-III Part B.

TABLE SC-I

**PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL
LEVELS FOR SCHEDULED CASTES**

This table is prepared for total Scheduled Castes and not for individual castes. It is prepared separately for total/rural/urban. The table gives data for students and unemployed persons in the non-working population. They are further classified according to broad educational levels consisting of literates, Primary or Junior Basic, Matriculation or Higher Secondary and above Matriculation or Higher Secondary. This table gives very useful informations on the students and unemployed persons among the Scheduled Castes.

**SC-I—PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND

TABLE ST-II : PERSONS NOT AT WORK CLASSIFIED BY SEX AND TYPE OF ACTIVITY FOR SCHEDULED TRIBES

This table is prepared for each individual Scheduled Tribe. This table gives data for students and unemployed persons in the non-working population. This gives the progress of education and the position in regard to the unemployment in the case of each individual tribe.

| Serial No. | Name of Scheduled Tribe | Total Non-working Population | | | | | | Full time students | | | | | | Persons seeking employment for the first time | | | | | | Persons employed before but now out of employment and seeking work | | | | | | Others | |

INTRODUCING THE OFFICIAL STATISTICS

The Tabulation Plan and other proposals for the 1961 Census envisaged the incorporation of official statistics on a large variety of subjects for each district in the District Census Handbook of the district concerned. This proposal was communicated to all Chief Secretaries of State Governments by the Registrar General as early as November 1960 with the request that each State Government should take up the collection of the data in right earnest so that the same may enrich the informations of the District Census Handbook. Each State Government was also welcome to further enrich the District Census Handbooks by any additional information that they may like to incorporate in the handbook. The items with other details were listed by the Registrar General and he also indicated the periods against which such data were to be collected. Copies of the above letter and the contents therein were forwarded to all Superintendents of Census Operations by the Registrar General with the request that the matter may be pursued with the State Governments. The data were to be processed and compiled by the Superintendent of Census Operations and incorporated in the District Census Handbooks of each district.

In pursuance of this communication from the Registrar General, I opened a small cell with a Statistical Assistant, one Upper Division Assistant and a few experienced tabulation personnel to take up the work and I addressed all the State and Central Government departments dealing with the subjects under which the data were to be collected and compiled. I pursued the matter not only by letters and reminders, but also by sending my staff to the various departments concerned to copy out the data wherever it was not possible for the department concerned to supply the data to me without extra hands. But in spite of persistent pursuit for about two years, all the data could not be collected. Some informations were not available at all, while some departments were not very co-operative. As the Census Publications cannot wait indefinitely for these informations, I have to process and compile whatever data are available to me.

The subjects listed to be collected embraced almost all spheres of the socio-economic life of the

people and the governmental activities connected therewith. From rainfall and temperature to places of ancient monuments and worship, from vital statistics to statistics of banks and insurances, from agricultural and land utilisation statistics to the statistics of local bodies, industries and so on, the plan was to appraise the stage of development of each one of the socially and economically important aspect of governmental activities during the last decade which coincides with the two Five Year Plans. Had it been possible to collect all the data in full, a clear picture would have been obtained of the stage of development of each district of Assam as well as the achievements and the impacts of the two Five Year Plans on the economy of each district of Assam. It would also have been possible to bring to light the inter-district and regional disparities in respect of development schemes in each district or region and these data could then be utilised as the basis for future plans and allocation of different schemes.

Realising the fact that well-conceived plans must be based on correct statistics, I started the work of collecting the data with earnestness and tried my utmost to collect as much information as possible off all departments of Government. But in spite of the best of exertions by me and my staff, only about 60% to 70% of the data had reached me till the end of 1962. These available data had been duly processed, compiled and presented in the table following this Note. Incomplete as they are, even the data thus presented in this book will surely give a picture of the various stages of developments in each district and region of Assam and I hope that my successor may improve upon the same in the next Census. I shall now briefly describe the original plan and the achievements in respect of the collection of data against each one of the broad heads in the cases below:-

1. Rainfall and Temperature

The aim was to give rainfall data of five centres and temperature data for two centres for each district of Assam for the period 1951-60. I addressed the Meteorologists in charge of the Regional Meteorological

logical Centre, Calcutta and the Gauhati Airport, I also addressed the Deputy Commissioners and Subdivisional Officers as well as the Adviser, Assam Branch of the Indian Tea Association, and I was able to collect rainfall data for five centres in the district. Regarding temperature data, they could not supply complete data even for two centres. But even the data thus collected and compiled will be reasonably accurate for the district.

2. Vital Statistics

I addressed the Director of Health Services, Assam, for supplying me with vital statistics which are so important for population planning and projection. Our plan was to show the births and deaths recorded for each month of the last decade against each police station in the district. The Public Health Department replied that they never have records of births and deaths down to the police station level and so I asked them to give the figures down to the district level, but even that also was not forthcoming. I sent my staff to the office of the Director of Health Services and they had to take much trouble in locating, extracting and compiling whatever data are available in that office regarding vital occurrences from the Vital Statistic Returns lying uncared for in the office premises of the Director of Health Services. But these data are absolutely inaccurate and they cannot give any picture of births and deaths in the district. However, the table is presented for whatever it is worth. In the General Report of the 1951 Census, the then Director of Health Services admitted that there is no doubt that the collection of registration data is defective. As far back as 1921, my predecessor Mr. Llyod remarks that "it is obvious that the vital statistical figures are useless for purposes of comparison or checking with the Census figures". In 1911, Mr. McSwinney remarks that "the inaccuracies are so great that there is danger of inferring that the present system of collecting vital statistics is absolutely useless". If the collection of vital statistics had been so bad in the past decades, it has been worse during the decade 1951-61. The Deputy Director of Health Services told me that when the data were collected by the police, mauzadars and the municipalities, something could be had from them; but when the collection has been entrusted to the Panchayats, no figures are available at all. Government may have to devise a definite scheme and a definite agency for the collection of these vital occurrences, otherwise these important statis-

tics are of no use as far as Assam is concerned.

3. Land Utilisation and Agriculture

In respect of land utilisation and agriculture, informations were proposed to be furnished under the heads - (i) land utilisation statistics (ii) area under principal crops (iii) gross area irrigated (iv) sources of irrigation (v) irrigation projects (vi) yield rates of principal crops (vii) statistics of daily agricultural wages (viii) fortnightly wholesale prices of important commodities month by month (ix) consumption statistics (x) details of socio-economic enquiries (xi) Agricultural extension schemes and (xii) cost of cultivation.

Statistics under these two heads are still in a very poor stage of development in Assam. In April 1961, I addressed the Director of Agriculture, the Director of Land Records and the Director of Statistics requesting them to supply me with as much data under the above heads as are available with each of them. The Director of Agriculture straightaway shifted this responsibility to the Director of Statistics. The Director of Statistics in his turn asked me to collect the data from his office records through some of my staff. The Director of Land Records directed the Settlement Officers and Deputy Commissioners concerned to supply the data direct to me. In accordance with the suggestion of the Director of Statistics, I sent a few employee of my office to collect the available data from his office records. Except for the periods 1901-1912, 1952 and again from 1958 onwards, most of the data were available and were collected accordingly. In reply to the Director of Land Records' letter to all Settlement Officers and Deputy Commissioners, only the Deputy Commissioners of Cachar and Goalpara and the Settlement Officer, Sibsagar submitted some figures. The rest are silent till now. I also made direct correspondence with all the Revenue and Settlement Officers but to no effect. For the period 1901-12 and 1952, I wrote to the Registrar General to see if the necessary figures could be extracted from some of the publications preserved in the archives of the Ministry of Food and Agriculture. The Registrar General was kind enough to take the trouble and get the figures collected and forwarded to me. These figures are included in the tables prepared under this head.

Within the above limitations, tables under Agriculture and Land Utilisation statistics have been

prepared and presented. Most of the tables are limited in scope and practical usefulness from the point of view of studying the trends of projecting a policy decision owing to lack of informations for the gaps during the period under reference. The period of reference 1901-1960 is interpreted as consisting of the Census years, namely 1901, 1911, 1921, 1931, 1941, 1951 and 1961. Each Census year represents five years, i.e. two years ahead and two years backward of the Census year which is also included. But the Census years 1901 and 1961 are exceptions to this rule. In view of the non-availability of data preceding the year 1901 and following the year 1961, the figures for the year 1901 has been worked out on the average of the years 1901 to 1905 and for that of 1961, the average was worked out from the year 1956-57 to 1960-61.

Although the original plan was to publish the prices of staple foodstuff and average prices of basic commodities month by month for the last decade with a cost of Living Index, the plan had to be restricted to the presentation of average retail prices of some important commodities due to the non-availability of data.

The construction of the cost of Living Index calls for informations regarding consumption level weightage, family budget etc. Such informations are not available even in the Department of Statistics. Consequently the idea had to be dropped. The Director of Agriculture had been requested to enlighten me with data regarding experiments in double and triple cropping and agricultural extension schemes, but even though a reply was received from him no data could be had from it. The data relating to consumption statistics and details of socio-economic enquiries have also been left out altogether on account of non-availability of data.

4. Livestock

Variation in the number of main livestock during 1920-60 was proposed to be given. I addressed the Secretary, Veterinary Department, Government of Assam who directed the Director of Veterinary and Animal Husbandry Department, to compile and forward the necessary figures to me. The Director of Veterinary Department could supply me with data only from 1945 onwards. For the earlier period, he said the data were not available in the Department.

5. Industries

I wrote to the Department of Industries for a

list showing the Cottage and Small Scale Industries of the Sibsagar district, but I was referred to the Assistant Director of Industries, Sibsagar. I wrote to the latter accordingly, but he could not furnish me any data. However, the list showing all categories of industries has been compiled from the Census data extracted from the Houselists and these are presented in the tables. I also wrote to the Chief Inspector of Factories and the Director of Industries to supply me with informations regarding the growth of factories from 1951 up to 1961, but they expressed their inability to do so. However, a list showing the large scale establishments as extracted from the Central Publication 'Large Scale Establishments' in India 1957 had been prepared and this was later supplemented with some informations received from the Director of Industries.

6. Administration

Under this head, informations were sought to be incorporated in this book in respect of the (1) number of criminal cases tried, (2) persons convicted, (3) strength of police, jails, (4) receipt of different kinds of taxes, (5) receipt of land revenue, (6) number of registered documents and (7) value of property transferred in the district for the latest period of time for which informations are available. The growth of co-operative societies from 1951 till 1960 was another item under this head.

Data regarding the number of criminal cases tried and persons convicted are collected from the "Report on the Administration of Criminal Justice in the State of Assam" which was subsequently supplemented by data extracted by my staff from the office records of the office of the Inspector General of Police, Assam. On the strength of Police in the district, whatever data that has been presented were compiled from the 'Report on the Police Administration in the State of Assam'. The Commissioner of Taxes was prompt enough to supply me with the figures of collections under different categories. I wrote to the Revenue Department and the Director of Land Records to send me the figures showing the receipt of land revenue during the last decade. The Director of Land Records referred me back to the Revenue Department. The Revenue Department made a lot of correspondences but no data were available from them. At long last, the compilation team could collect some figures from the 'Statistical Abstract' published by the Director of Statistics and office records of the Revenue Department unofficially. For information regarding the number of registered

documents and value of property transferred in the district, I made necessary correspondences with the Director of Land Records and Inspector General of Registration who referred me to the Accountant General and the District Registrars. I had written to the District Registrars accordingly, but nothing had been received. Data regarding different types of co-operative societies in the district were collected by my staff from the office records of the office of the Registrar of Co-operative Societies, Assam, Shillong which was subsequently supplemented by the information furnished by the Assistant Registrar of Co-operative Societies, Sibsagar, Jorhat.

7. Public Health & Medical

I wrote to the Civil Surgeon, Sibsagar, Jorhat for a list showing the different classes of Hospitals and Dispensaries in the district from 1951 to 1960. But no reply was received from him in spite of the fact that a number of reminders were issued to him. I also made necessary correspondences with the Director of Health Services, Assam, Shillong but it is regretted that all of my efforts were in vain and consequently the idea had to be dropped.

8. Education

Under this head, the intention was to show the increase in the number of various categories of schools and colleges including Medical and Technical from 1951 to 1960. I wrote to the Director of Public Instruction, Assam, accordingly and in spite of a number of reminders, he could not supply me with the required data. My next course was to depute an assistant to that office and get the informations collected. In this way, my staff with the co-operation of the office staff of the Director of Public Instruction, could collect informations for two years only. My staff were given to understand that informations for the earlier years were not available in the office of the Director of Public Instruction.

9. Public Entertainment, Press and Journals

The informations furnished under this head were supplied by the Deputy Commissioner, Jorhat and Subdivisional Officers, Sibsagar and Golaghat.

10. Communication

Under this head, informations were attempted

to be compiled regarding the number of (1) village roads, (2) roads and bridges, (3) railway stations, (4) list of important water-ways.

For data on village roads, I wrote to the Development Commissioner who was good enough to get the data collected through the Block Development Officers. But the informations received are not complete for the whole district. On roads and bridges, the Chief Engineer (Roads & Buildings) was addressed and he supplied me with a booklet from which the informations presented in this book were extracted. The list of railway stations in the district was supplied by the Chief Commercial Superintendent, North-east Frontier Railway, and the list of inland water-ways was furnished by the Director of Inland Water Transport, Assam.

11. Local Bodies

This includes the Panchayats in the rural areas and Municipalities and Town Committees in urban areas. A list of Anchalik Panchayats in the district with relevant particulars was received from the Panchayat and Community Development Department and presented below. A list of Municipalities and Town Committees in the district during 1961 is also furnished.

12. Community Development

The Development Commissioner, Assam, furnished me with a statement showing the names and stages of all the Community Projects in the district. After compilation, to make it intelligible to the general reader, the statement is re-produced in this volume.

13. Banks and Insurances

On request, the Director of Statistics was good enough to furnish me with a list showing the banking institutions in the district. Data on Small Savings were supplied by the Regional Director, National Savings, Government of India, Assam, Shillong. For data on the number of insurance policies in the district, I wrote to the Divisional Manager, Life Insurance Corporation, Gauhati, and the Managing Director, Life Insurance Corporation, Bombay but they could not supply me with the district-wise figures.

14. Fairs & Festivals and Hats & Markets

A list of Fairs and Festivals in the District was

furnished by the Deputy Commissioner, Jorhat, Subdivisional Officers, Sibsagar and Golaghat. The Secretaries of Anchalik Panchayats supplied data relating to Hats and Markets.

15. Calendar of Important Events

Informations regarding some important events taking place in the Sibsagar and Golaghat Subdivision were furnished by Shri B.C. Handique, Principal, Joysagar Rural Polytechnic and Subdivisional Officer, Golaghat respectively. No information was received from the Deputy Commissioner, Jorhat.

16. Ancient Monuments and Antique Objects

Under this head informations were received from Shri B.C. Handique., Principal, Joysagar Rural Polytechnic.

17. Gazetteer of Place-names

On this item no information was received in respect of the Jorhat Subdivision from the Deputy Commissioner, Jorhat while some data were received from the Subdivisional Officers, Sibsagar and Golaghat.

* The forest areas exclude the forest villages within the reserves for the years 1912-13 to 1950-51.

r Figures for the year 1912-13 only.

@ Including seedling areas.

+ Average of two years viz. 1951-52 and 1952-53.

** The informations relating to cultivable wastes, pastures and grazing land and miscellaneous tree crops and groves etc. were not available separately for the years prior to 1951-52 and these three categories were included under the group "cultivable wastes other than fallows" for the years 1912-13 to 1949-50 which changed into category "other uncultivated land excluding current fallows" for the years 1950-51 onwards. This category since 1951-52 had been divided into (i) cultivable wastes, (ii) permanent pastures and grazing lands and (iii) area under miscellaneous tree crops and groves not included under net area sown.

@ @ Including seedling areas for the years 1948-49, 1949-50 and 1950-51.

***Data presented for 1961 is the average of two years viz. 1956-57 and 1957-58. For the subsequent years viz. 1958-59 to 1960-61 data are not available.

EXPLANATIONS OF THE CODES USED FOR THE INDUSTRIES IN TABLE 5.1

| Sl. No. | Description | Code |
|---------|---|------|
| 1 | 2 | 3 |
| 1. | Production of rice, atta, flour etc. by milling, dehusking, and processing of crops and foodgrains | 200 |
| 2. | Production of indigenous sugar, gur from sugar cane or palm juice and production of candy | 202 |
| 3. | Production of bread, biscuits, cake and other bakery products | 205 |
| 4. | Production of butter, ghee, cheese and other dairy products | 206 |
| 5. | Production of edible fats and oil (other than hydrogenated oil) | 207 |
| 6. | Production of other food products such as sweatmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, coffee, lozenge | 209 |
| 7. | Production of country liquor | 211 |
| 8. | Production of aerated and mineral water | 214 |
| 9. | Processing of tea in factories | 217 |
| 10. | Manufacture of hookah tobacco | 223 |
| 11. | Cotton weaving in handlooms | 235 |
| 12. | Manufacturing of khadi textile in handlooms | 236 |
| 13. | Jute pressing and baling | 240 |
| 14. | Making of textile garments including rain coats and headgear | 273 |
| 15. | Manufacture of made-up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags | 274 |
| 16. | Manufacture of umbrellas | 278 |
| 17. | Sawing and planning of wood | 280 |
| 18. | Manufacture of wooden furniture and fixtures | 281 |
| 19. | Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows | 282 |
| 20. | Manufacture of other wooden products such as utensils, toys artwares | 284 |
| 21. | Manufacture of veneer and plywood. | 285 |
| 22. | Manufacture of materials from cork, bamboo, cane, leaves and other allied products | 288 |
| 23. | Manufacture of other wood and allied products not covered above | 289 |
| 24. | Printing and publishing of books | 301 |
| 25. | All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry | 302 |
| 26. | Manufacture of shoes and other leather footwear | 311 |
| 27. | Repairing of shoes & other leather footwear | 314 |
| 28. | Manufacture of matches | 334 |

EXPLANATIONS OF THE CODES USED FOR THE INDUSTRIES IN TABLE 5.1 (Concl.)

| Sl. No. | Description | Code |
|---------|--|------|
| 1 | 2 | 3 |
| 29. | Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap | 335 |
| 30. | Manufacture of Soap and other washing and cleaning compounds | 336 |
| 31. | Manufacture of structural clay products such as brick tile | 340 |
| 32. | Manufacture of earthenware and earthen pottery | 350 |
| 33. | Manufacture of iron and steel furniture | 364 |
| 34. | Manufacture of brass and bell metal products | 365 |
| 35. | Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can | 367 |
| 36. | Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products | 368 |
| 37. | Manufacture of sundry hardwares such as G. I. Pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in codes 364, 365, 367, 368, 370, 372, 380, 381, 384, 388, 390, 392, 393, 394 and 399) | 369 |
| 38. | Manufacture and assembling of machinery other than electrical, except textile machinery | 370 |
| 39. | Manufacture of machine tools | 372 |
| 40. | Manufacture, assembling and repairing of locomotives | 380 |
| 41. | Manufacture of wagons, coaches, tramway and other rail road equipment other than manufacture of structural steel Products such as joist, rail, steel and plate | 381 |
| 42. | Repairing and servicing of motor vehicles | 384 |
| 43. | Repairing of bicycles and tricycles | 388 |
| 44. | Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment supplies | 390 |
| 45. | Assembling and repairing of watches and clocks | 392 |
| 46. | Manufacture of jewellery, silverware and wares using gold and other precious metal | 393 |
| 47. | Manufacture and tuning of musical instruments | 394 |
| 48. | Manufacture and repair work of goods not assignable to any other group | 399 |

NOTES ON CALENDAR OF IMPORTANT EVENTS IN THE DISTRICT DURING THE PERIOD 1951-61.

Sibsagar Subdivision :—

Flood :— The most devastating calamities of the subdivision during the period under review were successive floods every year. Specially the Panidihing Nitai Thwara, Kongerpur, Jakachuk mauzas were worst affected areas. The flood of 1960-61 submerged these areas effecting 37,510 families and causing loss of 105 cattle and damaging paddy and other crops grown over 6,452.6 acres of land. The Government had to spend Rs. 21,505 as gratuitous relief, Rs. 3,000 as agricultural loan, Rs. 5,000 as rehabilitation loan, Rs. 50,000 as seed loan and Rs. 547,788 as test relief works as relief measures.

Naga Disturbances :— During the period a number of raids were committed by the hostile Nagas in the border areas of the subdivision.

Oil and Natural Gas :— The first discovery of oil was made at Moran, within this subdivision by M/S Oil India Ltd. The Indian National Commission for Oil and Natural Gas in 1959 located the first exploratory well at Langchai near Debangmukh. In the year 1960 drilling was started at Rudrasagar (old Rangpur City) and upto now works of drilling in four places are going on.

Other Institutions :— During this period few important Government institutions were started on the bank of Joysagar tank. The State level training centre for Co-operative department, namely The Assam Co-operative Training Institution was started on 23rd October, 1951. The first Artificial Insemination Centre under the Key Village Scheme was established on 21st December 1952. A basic training centre and a Training-cum Production Centre were started in February, 1959 and in March 1959 respectively. From the non-government side, a second Art College was started at Gargaon.

Golaghat Subdivision :— There has been no such important events in this subdivision except the following.

The High flood of the Brahmaputra and its tributaries inundated the northern part of the subdivision, namely Ahatguri, Dergaon, Missamora, Ranganmati, Mohura, Bokakhat and Kaziranga Mauzas almost in every year. In 1959 the high flood of the river Dhanisi inundated a major portion of Golaghat revenue circle. The flood usually caused damages to standing crops, displaced riverine people and was always followed by erosion.

Draught, cattle epidemic and human epidemic, specially small pox, prevailed in the subdivision during the period under review. Some villages of the Nagaland bordering areas were effected occasionally by the hostile activities of a section of Nagas.

Socio-economic condition of the people in general has been improved due to coverage of the entire subdivision with five Development Blocks and Anchalik Panchayats. Two such Blocks are still in shadow stage. People at large are deriving benefit from the different Development Programmes taken by the Government under the Five Year Plans.

The Assam Co-operative Sugar Mill Ltd. was established at Borua Bam in Guon in the year 1958-59. Establishment of this Mill has given relief to a large number of people to take up sugarcane cultivation to feed the Mill.

A DESCRIPTIVE NOTE ON THE ANCIENT MONUMENTS AND ANTIQUE OBJECTS OF THE DISTRICT

SIBSAGAR SUBDIVISION

Sibsagar tank and temples :— Sibsagar tank was excavated in Saka 1655 (1735 A.D.) by Queen Amolika, wife of King Siva Singha. The area under water is 129 acres of land and that including the four banks, is 257 acres. It is a spring fed tank and surrounded by deep ditches and earthen moats.

The three temples on its bank, namely Muktinath Siva temple, Vishnu temple and Devi temple were constructed in the same year by the same Queen. The height of the main temple is 120 feet and the golden dome is 7½ feet.

The name of the town, subdivision and the district Sibsagar originated from the name of this tank.

For a long time Sibsagar (Rangpur) was the administrative Headquarters of Assam.

Rangpur Group :— (Stand about a mile to the south of Sibsagar town).

Kareng and Takhal Ghar :— This was the third capital and Military station of the Ahom Kings for more than 95 years. This palace was first constructed by King Rudra Singha the Great in 1699 A.D.

The present palace is a building of seven stories, four above and three below the ground and containing two underground ways, connecting the Dikhow river and the Gargaon palace.

Rang Ghar :— (Amphitheatre) It is a brick building of two stories, oval in shape constructed by King Pramatta Singha in about 1746 A.D. The Kings and the subjects used to enjoy sports etc. in this place.

Others :— Around this palace there are several ruins such as the Gola-Ghar (Magazine house), Rangnath Siva temple, Hara-Gauri temple, Gaurivallav temple, Govendar Fagwadol, a brick vault and two stone and brick bridges.

Joysagar Group :— (Stands at a distance of three miles to the south of Sibsagar town).

Joysagar tank and temples :— Historical records reveal that 'In Saka 1619 (1697 A.D.), 3rd day of the month of Agrahayana, Thursday, a tank was constructed at Rangpur in 45 days'. The spot of the tank was divine by a method of spotting and tapping the hidden spring by the 30th Ahom King Chao Sukhrangpha alias Swargadeo Rudra Singha in memory of his mother Joymoti Koonwaree, who sacrificed her life for the sake of her country and husband through tortures inflicted on her for more than 12 days by the order of the then Ahom King, Sulikpha.

According to the old records the tank comprises an area of 318 acres of land including its four banks, out of which 155 acres are under water. The perimeter of the tank is 2 miles 4 fms. 96 yds.

On it, the Joydol (Vishnu temple), Siva temple, Devi Ghar and Ghanashyam (Nati Gosain) temple were constructed by the same king.

Gaurisagar Group :— (Stands at about 9 miles to the south of the town on the Assam Trunk Road side).

Gaurisagar tank was constructed by Queen Phuleswari, the first wife of King Siva Singha in 1723 A.D.

The area of this tank under water is 150 acres and including its four banks 296 acres of land. It is a spring fed tank.

Temples :— On its bank, stands the Devi, Siva and Vishnu temples.

Namdang stone bridge stands to the east of this tank and the Assam Trunk Road passes over it. This bridge was constructed by King Rudra Singha in about 1703 A.D.

Between Joysagar and Gaurisagar stand the Athas Sagar tank and the Rudra Sagar tank with a temple.

Gargaon Palace — It lies 8 miles to the east of Sibsagar town. This principal capital of the Ahom kings was constructed at first by the 15th Ahom king Suklenmung in about 1540 A.D. All the stone and brick buildings were destroyed long ago. The present surviving palace of seven stories was rebuilt by king Rajeswar Singha in about 1757 A.D. All the underground stories and subterranean passages were closed by the Officers of the East India Company. The brick made strong magazine room is within the palace compound.

Towards further east there are two old stone bridges constructed by king Chao Supri pha alias Gadadhar Singha.

Charaideo Group — The conqueror of Assam, Sukapha, who was also the founder of the Ahom kingdom in Assam, established his capital in about 1229 A.D. at Charaideo. This place is famous for numerous lofty Maidams (Vaults) of the Kings and the members of the royal families. To some extent these vaults resemble the Pyramids of Egypt. Most of these vaults were of bricks and stones. Still there are remains of earthen walls, brick plinths, temples, tanks and roads. Almost all the maidams of this place as well as other were places molested and properties looted by different miscreants in different ages.

Other Shrines — There are a great number of old Satras of Vaishnava cult. Muslim Dargahs as Ajan Pir Majhar, Khundhar Pir Majhar, Sawal Pir Majhar. There are several villages of Shan (Thai) people with Buddhist shrines within this subdivision. Besides these there are several very old Sakta Shrines as Ramkha shrine, Deosal, Deoabil, Tengaponia and Bor Gaon Dewri Shrines etc.

Within this subdivision there are more than 500 big and small old tanks, hundreds of vaults, earthen forts, and many Rajbaris belonging to the Ahom Princes, Manipuri Princes, Kachari Kings, Jayantia (Khasis) Princes and other Shan Princes.

More than 90 per cent of the roads of this Subdivision were constructed in olden times by the Ahom Kings and their nobles.

JORHAT SUBDIVISION

Jorhat was formerly known as Desoi Bahar. During the rule of the Ahom King Gaurinath Singha the capital was transferred from Rangpur (Sibsagar) to Jorhat in 1794 A.D. The name Jorhat originated from two markets. During the time of the British the Headquarters of Sibsagar District was transferred from Sibsagar to Jorhat in 1913 A.D.

Jorhat is not so rich with old relics. Moreover all traces of the Royal palaces and other buildings disappeared long ago. However remains of a few old relics are briefly described below.

Rajmau tank (Vishnu Sagar) commonly known as Bor Pukhuri stands in the middle of the town. This tank was constructed in the name of the King's mother.

Buri Gossani Dewaloy lies on the south bank of Toklai river and on the northern side of the town. The deity of this shrine was transferred from its original site at Rangpur by King Gaurinath Singha. The present temple is a new one.

Raja's Maidam — The Maidams of the last Ahom king Purandar Singha and Juvaraja Kameswar Singha stand on the south bank of Toklai river. The vault of the famous Prime Minister Purnananda Buragohain lies near old Machar hat.

Villeswar Siva temple or Hatigarh Dewaloy with tank stands about at a distance of three miles to the north of Jorhat town on the side of the Trunk Road. The temple and the tank were constructed by Ruchi Nath Buragohain during the reign of Kameswar Singha. This shrine is commonly known as Buragohain Dewaloy.

At a little distance towards the North lies the old Hatigarh. Borbheti lies at Malow pathar towards the north-west side of Jorhat Town. There are remains of three earthen mounds known as Borbheti, Majhorbheti and Majiabheti constructed by the followers of Moamaria Guru Chatturbhuj.

Gorokhiadol, an old shrine stands at a distance of three miles to the north of the town. The history of this shrine is obscure.

Majuli — Majuli is the world's greatest river island which covers an area of nearly 464 sq miles, with a length of 80 miles and an average breadth of 9 miles. This island can be called the cultural and religious centre of Assam. There are about 96 Satras (Vaishnava-Shrines) of which Dakshinpat, Auniati, Gormurh, Kamalabari, Benganaati, Samoguri etc. are well known. There are ruins of many old tanks and other sites within this area.

Besides these the whole subdivision is full of old tanks, roads, earthen forts (Garh), Maidams and religious shrines. Within the town the great martyr Moniram Dewan was executed in 1858 A.D.

Jorhat is proud of its old Government High School, Court, the important Tea Experimental Centre, Assam Agriculture College etc. There are numerous tea gardens in this Subdivision.

GOLAGHAT SUBDIVISION

It is said that the name of Golaghat originated from a big 'Gola' (Market) which stood on the bank of the Dhansiri river, during the later part of the Ahom rule. This Subdivision was formed in 1846 A.D.

In the month of November 1951, its Mikir Hills areas has been transferred to United Mikir & North Cachar Hills district and as such some old ruins have gone to this new district. This Subdivision is rich in various ruins of both Ahom and Kachari Kings. It is also believed that there are some pre-Ahom and pre-Kachari relics. Unfortunately, complete history of many ruins are not available. Most of these old ruins collapsed long ago for want of protection and preservation.

Neghresting Siva Temple — Situated on the north side of the Trunk Road near Dergaon and within Neghresting tea garden. The Ahom King Rajeswar Singha constructed the temple in the middle of the eighteenth century on the top of Neghri Hillock. This temple differs from the Siva temple of Sibsagar Subdivision in style. The Archaeological Department of the Government of India granted protection to this temple on 21.7.13.

Dever-gaon or Dergaon Temple — The old site of the above temple was towards the north of Neghresting temple. This temple was built by Swargadeo Susenpha through Momaitamuli Bor Borua in 1627 A.D. This old temple was washed away by the flood caused by Brahmaputra long ago.

Bari-Gosani Dewaloy :—It stands near Dergaon. The temple collapsed and the fine image of goddess has been missing recently. Quite near to these ruins, the Assam Police Training Centre stands. The Assam Sugar Mill started recently at Borua Bamui Gaon.

Athgaon Than :— This old shrine stands at a distance of about 2 to 3 miles from Furkating Railway Station towards Golaghat town. The stone image of Devi is still worshipped in a building. History of this shrine is not known.

Halwa Gosani Than :—Within Morangi Mauza and on the side of the Pahar line road. The temple was constructed by King Gaurinath Singha in 1744 A. D. The temple has collapsed. It is a living temple.

Deopani Shrine :— Stands within Deopani tea garden. The Old temple was destroyed and the image of goddess with few inscription on its body lies there. The history is not clear.

Numali Garh :— The great earthen fort known as Numali garh was built by King Susenpha (Pratap Singha). A town (Bahar) known as Numali bahar was also constructed with brick buildings, brick ghats, compound etc. on the south of the Dhansiri river near the fort. The two other forts known as Rajgarh and Lokhow garh join this main fort.

Ruins :— On the side of this fort, near Numaligarh tea garden and on the hill (Deo Parbat) there are ruins of an old temple. Many are of opinion that these ruins belong to pre-Ahom and pre-Kachari periods. The entire hill is full of ancient relics/temple, gateway pillars, plinth and a huge number of images and other artistic designs. This place has great archaeological value. History of this place is obscure. The 'bigraha' of Lord Siva was removed from the top of the hill to a distance of about 2 furlongs on the road side and daily worship is performed there. For want of protection these rich articles of high artistic and sculptural value are decaying.

Kaziranga :— Situated on the west end of Golaghat Subdivision. This vast area was a thickly populated and prosperous place during the reign of the Ahom Kings. The remains of innumerable tanks, plinths, vaults, shrines and roads show how this place was a prominent one in olden times. Now it is changed into a howling jungle and marshy land, inhabited by rhinoceros, tigers, buffalo and reptiles etc. This site now becomes the famous wild life sanctuary of Assam.

Kako Gosani Than :— In Kaziranga area. This is an old Sakta shrine, founded by King Gadadhar Singha. It is said that King Gadadhar Singha used to worship the deity which he kept concealed within a Kako bamboo Chunga (pipe) during his time of absconding from Rangpur.

Basanti Than :— In Kaziranga area. It stands at a little distance from the Trunk Road. The image is of Durga Devi and annual celebration of Durgatsava is held in the spring season. History is obscure and there is no old temple.

Kalumai Than :— Another Sakta shrine is Kalumai Than within this area. Details of this shrine are not known.

Besides these, there are numerous big and small old tanks, forts, vaults, shrines, roads, images and about 52 satras of olden times

A NOTE ON GAZETTEER OF PLACE NAMES IN THE DISTRICT

1. **Sibsagar Town** :— During the reign of the Ahom Kings, the present Sibsagar town was mere a village. Queen Ambika dug the lake like tank in her husband's name and dedicated it to Lord Siva. Afterwards the place was known as Sibsagar after the name of Sibsagar tank. Once it was the Headquarters of Upper Assam and afterwards the Headquarters of the district up to 1913 A. D. during the rule of the British Government. At present it is the Subdivisional Headquarters of Sibsagar Subdivision. All the important Government Offices including the jail are on the banks of Sibsagar tank. It is an old semi-rural small town inhabited by old families of nobilities of Ahom age. Educationally it is not backward. There are seven High Schools including two Girls' High Schools, and a Degree College at Joy sagar. The sub-office of the Archaeological Department, Government of India, for Assam, NEFA, Manipur etc. stands on the bank of Sibsagar tank near the tourist Bungalow. State Transport service and railway are the main communication means of this town. The Headquarters of the newly started Oil and Natural Gas Commission is within this town. Total population of this town is 15,106. The town is administered by a Municipal Board.

2. **Nazira** :— Nazira is the second important place of this districts. It is a small town with a town committee, Sub-Deputy Collector's office, police station, dispensary, and two High Schools one for the boys and other for the girls. It may be called the centre of Tea Industry. The Assam Tea Company was started here in 1839 A.D., which is the pioneer of tea industry of India. This is also an old historical place. Main communications are railway and public transports. Nearby important places are Bortal with a High School, Baraghar satra, Mezanga, Mekipur, Athkhel and Gellekey etc.

Simaluguri, an important commercial place and a railway Junction, with a high school is quite near to Nazira. The old Gorgaon, Borkula Nagar and Gorgaon College are at a distance of one mile towards the north of this town and on the opposite bank of Dikhow river.

3. **Sonari** :— The next important place of Sibsagar Subdivision is Sonari, towards north-east corner of the subdivision. It is a small town with a town committee, Sub-Deputy Collector's office, police station, dispensary, P.W. D. (R&B) S. D. O's office and a high school. The place is important for tea industry. Nearby places are Bhojo, Naphuk, Joboka, Abhaypur forest reserve. The Dhodar Ali is the main communication line of this place.

4. **Moran** :— A border place between Sibsagar and Dibrugarh Subdivision. It is a small town with a town committee, railway station, police station, Inspection Bungalow, and a High School. The Assam Trunk Road and the railway are the main communications of this place. It is important for tea industries and Moran oil field. Nearby places are Rangali forest reserve, Sepon, Khatkhathi with a High School.

5. **Amguri** :— Another important place situated on the border of Sibsagar Subdivision and Jorhat Subdivision. It is a developing small town with a police station, high school, railway station and a number of tea gardens around it. It stands on the bank of Jhanjee river. The Amguri-Mokokchung road runs from this place. Nearby places are Bhuyan Khat, Borbam, Lalim Chiga etc.

6. **Demow** :— Stands twelve miles to the north of Sibsagar town, forming a portion of the boundary of Sibsagar and Dibrugarh Subdivision. It is the headquarters of Demow Development Block. Important institutions of this place are one police outpost, and one high school. Around it there are a great number of tea gardens. Nearby important places are Rajmai with an old tank, Thawara with an old tank and a small temple, Athabari with an old tank, Kharahat, a railway station, Sukan pukhuri with an old tank and Nital phukuri with an old tank, one high school, and a few tribal villages.

7. **Desangmukh** :— On the bank of the Brahmaputra river, a flood stricken place mostly inhabited by Miri tribes. Important institutions of this place are the steamer ghat, one basic school and a weekly bazar. A muslim Dargah known as Khundhar Peer Dargah is near to it. Asokastami sacred bath is the main celebration of this place.
8. **Joysagar** :— Stands at a distance of three miles to the south of Sibsagar town, a historical and tourists' important place of the Subdivision. Living aside the historical objects, this place is gradually developing with oil industry around it. Important institutions are Government Rural Polytechnic (Panchayat Training Centre), Assam Co-operative Training Institution, Govt. Fishery and training research centre, Basic Training Centre, Key-village centre, Training-cum-production centre (Cotton Industry) and the Sibsagar College. All these institutions stand on the banks of the tank.
9. **Rudrasagar or No-pukhuri** :—an old tank with a small temple on its bank gradually developing into an oil industry place. It stands towards south of Joysagar at a distance of 1½ miles. Drilling is going on in six places of this locality. Quite opposite to this tank another old tank known as Athay sagar (Purani pukhuri) stands on the side of the Assam Trunk Road.
- Towards the south-east of Joysagar and at a distance of 2 miles from it there is an old tank with two temples, known as Lakshmi sagar or Borpatradol. One High School and a few other educational institutions stand on its bank. This place is surrounded by a number of thickly populated villages. Magarahat, Kharagarh are nearby important places of Borpatradol.
10. **Bogidol** :— Stands on the east of Joysagar at a distance of 2 miles from it and on the side of the Bor Ali road. After the name of the Bogi Rajmaw tank and temple this place is known as Bogidol. Drilling of oil is going on its bank by the Oil and Natural Gas Commission. Nearby important places are Mechagarh with an old tank, old earthen fort known as Bah garh, one High School, Mathiachiga, with an old tank known as Rajmao tank and a number of vaults of Ahom nobles of Ahom age, Maduri with a dispensary and a few old vaults and a small tea garden. All these localities are densely populated by the descendants of the old Ahom nobles.
11. **Charing** :— A historical place situated towards the south of Sibsagar town at a distance of about 12 miles. It is an advance place with a Boys' High School, one Girls' High School, dispensary. This area is a combination of thickly populated advanced villages with their old cottage industries. Deo-Raja Maidam is within this place with an old vault and a tank and a High School with provisions for craft training. Other nearby important places are Neog Gohain Pukhuri, with an old tank, Phulpani Chiga, Maura bazar with an old tank.
12. **Janji** :— An old place of historical importance inhabited by old families with their traditional crafts. It forms the boundary of Jorhat and Sibsagar Subdivision which is marked by the Janji river. There are one Boys' High School, one Girls' High School, Civil dispensary, Transport station, P.W.D. Bungalow etc. which form the main public institutions of the place. This place is a bit commercial one. Nearby places are Khanamukh, Jamuguri, Bamun pukhuri, and Tamuli Chiga, etc.
13. **Gaurisagar** :— Besides having the historical objects this place is important for the Govt. Sericulture Farm, Civil dispensary, High School and a weekly bazar. The old Stone bridge over the Assam Trunk Road of Ahom age is quite near to it.
14. **Dikhow Mukh** :— It is on the banks of the Brahmaputra and Dikhow rivers, a flooded area, inhabited by tribals and other communities. This was an old steamer ghat. Important institutions of this place are one Boys' High School and a Civil dispensary. Ancient relics are one old tank known as Tehadungar pukhuri, Khanakhukura Pukhuri, Chintamani Garh (Earthen fort of Ahom age), Ramkha shrine, Muslim Shrine as Ajan Pir's Dargah etc.
15. **Sapekhati** :— Important place for tea industry inhabited by Shan Tai people, tea garden labourers and others and a border place. Important institutions are Headquarters of Sapekhati Development Block, one Boys' High School, dispensary, weekly market and a few Buddhists shrines. It is a Railway station also. Nearby place are Aideobari, Rahan, Baga bagh, Kanubari, Borhat.
16. **Bokota** :— On the side of Salaguri road and on the bank of Desang river a developing place with two High Schools one at Namuguri and other at Patsaku, and a civil dispensary.
17. **Namti** :— Old place of historical importance. The old Namti tank and two temples on its bank and a high school are the important public institutions of this place. It is a railway station. Nearby important places are Tiphook, Deopani, Michajan, Barahibari etc.
18. **Suntak** :— An important place for tourists, stands on the bank of the Dikhow river and on the border near Nagaland. A small waterfall known as Hathati on the bank of the upper course of Dikhow is an interesting site. It is a tea garden with a railway station. The stone quarries of Bihubor and Naginimara are adjacent places which bear nice sceneries. Its nearby places are Adavari, Rahdai with a big tank and a few vaults, Charaideo with numerous royal vaults. It is a centre of tea industry.
19. **Deshang Pani** :— It stands on the side of Sepon Suffray road and on the bank of Desang river. A few Shan villages with three small Buddhists shrines on both sides of the river are the interesting objects of this place. Besides these, the Headquarters of Sonari Development Block, one Boys' High School are important institutions of this place. Nearby important places are Kharghoria Doba, inhabited by the descendants of Ahom priest classes, and a High School, Mahmara, Tiphook, Suffrai railway station and tea garden, Salas pathar with Buddhist temple, Banamali etc.
